**New View of the Moon 2** Clive R. Neal, Lisa R. Gaddis, Bradley L. Jolliff, Samuel J. Lawrence, Stephen J. Mackwell, Charles K. Shearer, Sarah N. Valencia, 2024-05-06 Much has happened in the world in the 17 years since the first New Views of the Moon was published as volume 60 of the Mineralogical Society of America in 2006 An exciting new era of lunar exploration has begun including the promise of resuming human lunar exploration exploring the lunar Poles and missions to many other high priority science targets It is fitting therefore to now summarize the current state of knowledge to the degree possible at a time when

advancements in knowledge of the Moon are proceeding at a breakneck pace Therefore during this period of unprecedented lunar exploration activity and as we continue to rebound from a global pandemic we now happily announce this New Views of the Moon 2 volume summarizing the advances in lunar science and exploration since 2006 The Steering Committee is eternally grateful to all contributors and especially the chapter leads and to Professor Makiko Ohtake University of Aizu Japan and Dr David Blewett Johns Hopkins University Applied Physics Laboratory U S A for organizing the New Views of the Moon 2 Electronic Annex We deeply appreciate the hard work and dedication of everyone involved in the production of this volume especially Rachel Russell and Ian Swainson at the Mineralogical Society of America This volume helps to frame our knowledge and expectations for an exciting future of lunar science and exploration and the new discoveries to be made Having humans return to the Moon now seems more likely than it ever has since the last humans left the Moon on 14 December 1972 Fission-Track Thermochronology and its Application to Geology Marco G. Malusà, Paul G.

**Commercial Operations** Great Britain: Parliament: House of Commons: Culture, Media and Sport Committee, 2009 This report investigates the governance of the BBC's commercial arm BBC Worldwide the activities of BBC Worldwide including programme sales production magazines and websites BBC Worldwide's acquisition of Lonely Planet and the possible partnership between BBC Worldwide and Channel 4 There are major benefits from the BBC undertaking commercial activities the profits generated by the exploitation of the BBC's intellectual property can be reinvested in the BBC's public services to the benefit of licence fee payers But the manner in which some of the BBC's commercial revenue is generated and the governance arrangements within which the BBC Worldwide operates causes increasing concern Worldwide has proved successful in recent years in exploiting new commercial opportunities made possible by a loosening of the rules that govern the limits to its operations However there a balance to be drawn between Worldwide generating a return for the BBC and

limiting Worldwide's operations in order to ensure it upholds the BBC's reputation and does not damage its commercial competitors Worldwide's minority stakes in overseas production companies its controversial acquisition of Lonely Planet and its growing portfolio of magazines suggest that the balance has been tipped too far in favour of Worldwide's unrestricted expansion jeopardising the reputation of the BBC and having an adverse impact on its commercial competitors It is in the interests of the UK's creative economy as a whole that BBC Worldwide's activities are reined back The BBC Trust should reinstate the rule that all BBC commercial activity must have a clear link with core BBC programming

**Preventive Methods for Coastal Protection** Tarmo Soomere, Ewald Quak, 2013-06-28 The aim of the book is to present for non specialist researchers as well as for experts a comprehensive overview of the background key ideas basic methods implementation details and a selection of solutions offered by a novel technology for the optimisation of the location of dangerous offshore activities in terms of environmental criteria as developed in the course of the BalticWay project The book consists of two parts The first part introduces the basic principles of ocean modeling and depicts the long way from the generic principles to the practical modeling of oil spills and of the propagation of other adverse impacts The second part focuses on the techniques for solving the inverse problem of the quantification of offshore areas with respect to their potential to serve as a source of environmental danger to vulnerable regions such as spawning nursing or also tourist areas The chapters are written in a tutorial style they are mostly self contained and understandable for non specialist researchers and students They are carefully peer reviewed by international experts The goal was to produce a book that highlights all key

steps methods models and data sets it is necessary to combine in order to produce a practically usable technology and or decision support system for a particular sea region Thus the book is useful not only as a description and a manual of this particular technology but also as a roadmap highlighting the complicated technical issues of ocean modeling for practical purposes It describes the approaches taken by the authors in an understandable way and thus is useful for educational purposes such as a course in industrially and environmentally relevant applications of ocean modeling *Monthly Catalog of United States Government Publications* ,1992 *Educational Screen and Audiovisual Guide* ,1928

**Next Industrial Revolution, The: A New Age For Innovation In Industry** Vincent Petit,2023-06-15 In The Next Industrial Revolution Vincent Petit builds on his earlier work *The Age of Fire Is Over* 2021 where he explored how key transformations in consumption patterns impact our energy system in ways that have been seldom envisioned He further develops this work here and traces how these transformations apply to our modern industrial system the bedrock of our global economic development and wealth creation Petit argues that the world is on the cusp of the next centennial transformation of our industrial system driven by major technological enhancements considerable opportunities for productivity step changes but also significant resiliency and environmental challenges Through a deep and unique exploration of the innovation landscape and global context in each major sector of industry the author sheds light on the key changes that will transform not only every sector of activity but also the way they interact with one another to produce nothing short of a complete redesign of our industrial system The way such transformation will unfold will however depend on the complex entanglement of technological progress policy business transformations and cultural evolutions Through different scenarios the author highlights some of the key decisions that need to be made today in order to make the most of this opportunity
