Gmirkin,2022-05-02 Plato s Timaeus and the Biblical Creation Accounts argues that the creation of the world in Genesis 1 and the story of the first humans in Genesis 2 3 both draw directly on Plato s famous account of the origins of the universe mortal life and evil containing equal parts science theology and myth This book is the first to systematically compare biblical Ancient Near Eastern and Greek creation accounts and to show that Genesis 1 3 is heavily indebted to Plato s Timaeus and other cosmogonies by Greek natural philosophers It argues that the idea of a monotheistic cosmic god was first introduced in Genesis 1 under the influence of Plato s philosophy and that this cosmic Creator was originally distinct from the lesser terrestrial gods including Yahweh who appear elsewhere in Genesis It shows the use of Plato s Critias the sequel to Timaeus in the stories about the Garden of Eden the intermarriage of the sons of God and the daughters of men and the biblical flood This book confirms the late date and Hellenistic background of Genesis 1 11 drawing on Plato s writings and other Greek sources found at the Great Library of Alexandria This study provides a fascinating approach to Genesis that will interest students and scholars in both biblical and classical studies philosophy and creation narratives **Philosophy of Science: The Key Thinkers** James Robert Brown,2021-07-15 From the 19th century the philosophy of science has been shaped by a group of influential figures Who were they Why do they matter This introduction brings to life the most influential thinkers in the philosophy of science uncovering how the field has developed over the last 200 years Taking up the subject from the time when some philosophers began to think of themselves not just as philosophers but as philosophers of science a team of leading contemporary philosophers explain criticize and honour the giants Now updated and revised throughout the second edition includes Easy to follow overviews of pivotal thinkers including John Stuart Mill Rudolf Carnap Thomas Kuhn Karl Popper and many more Coverage of central issues such as experience and necessity logical empiricism falsifiability paradigms the sociology of

Marx, Engels and the Philosophy of Science David Bedford,Thomas Workman,2022-12-31 This book expounds the dialectical conception of science largely implicit in the writings of Marx and Engels offering a sympathetic reconstruction of a philosophy of science commensurate with Marx s thought Drawing on a reading of dialectics found in Plato and Hegel it recasts Marx s implicit ontology in terms of dialectical conceptions of the world as these conceptions have responded to the growing sophistication of modern science It thus deepens our understanding of materialist philosophy as it relates to science and draws out Marx s logic of science in light of continuing discussions As such it will appeal to philosophers with interests in the nature and development of science and Marxist thought
