**Civic Education in the Twenty-First Century** Donald M. Gooch,Michael T. Rogers,2015-09-18 Imagine an America where politicians governmental institutions schools new technologies and interest groups work together to promote informed engaged citizens Civic Education in the Twenty First Century brings together scholars from various disciplines to show how such a United States is possible today Inspired by Alexis de Tocqueville s analysis of American democracy in the early 1800s this edited volume represents a multidimensional evaluation of civic education in its new and varied forms While some lament a civics crisis in America today Civic Education in the Twenty First Century raises hope that we can have an informed and active citizenry We find the activities of a number of politicians government institutions schools and interest groups as promising developments in the struggle to educate and engage Americans in their democracy New technologies and new innovations in civic education have laid the foundation for a revitalized American civic ecology With Civic Education in the Twenty First Century we call for the United States to make these practices less isolated and more common throughout the country The volume is broken into three major sections First there are four chapters exploring the history and philosophical debates about civic education particularly with respect to its role in America s educational institutions Then the second section provides seven groundbreaking inquiries into how politicians and political institutions can promote civic education and engagement through their routine operations As some examples this section explores how politicians through campaigns and judiciaries through community programs enhance civic knowledge and encourage civic engagement This section also explores how new technologies like the Internet and social media are increasingly used by government institutions and other entities to encourage a more politically informed and engaged citizenry Finally the third section contains six chapters that explore programs and practices in higher education that are enhancing civic education engagement and our knowledge of them From the virtual civics campus of Fort Hayes State to citizens academies throughout the country this section shows the possibilities for schools today to once again be civics actors and promoters

**Facts** James W. Cortada, 2023-01-09 For over twenty years James W Cortada has pioneered research into how information shapes society In this book he tells the story of how information evolved since the mid nineteenth century Cortada argues that information increased in quantity became more specialized by discipline e g mathematics science political science and more organized Information increased in volume due to a series of innovations such as the electrification of communications and the development of computers but also due to the organization of facts and knowledge by discipline making it easier to manage and access He looks at what major disciplines have done to shape the nature of modern information devoting chapters to the most obvious ones Cortada argues that understanding how some features of information evolved is useful for those who work in subjects that deal with their very construct and application such as computer scientists and those exploring social media and most recently history The Birth of Modern Facts builds on Cortada s prior books examining how information became a central feature of modern society most notably as a sequel to All the Facts A History of Information in the United States since 1870 OUP 2016 and Building Blocks of Society History Information Ecosystems and Infrastructures R L 2021 **Social Policy in the Islamic World** Ali Akbar Tajmazinani, 2020-12-18 This book examines social policy in

Muslim countries across the world and the status and role of Islamic teachings in such policies It fills a gap in the literature by reviewing and comparing the experience of several Muslim countries from across the world The existing social policy literature lacks a comprehensive appraisal of the social policy scene in Muslim societies especially from a comparative perspective This book will be of interest to a wide audience in the academic and policy forums related to and interested in Muslim societies and communities *Countries and Concepts* Michael G.
