Extremisms in Africa Volume 2 Alain Tschudin, Craig Moffat, Stephen Buchanan-Clarke, Susan Russell, Lloyd Coutts, 2019-06-18

Over the past two decades, the rapid emergence and spread of both local and transnational extremist organisations has become a primary source of insecurity in Africa. Extremist organisations represent the fluid and variable nature of conflict systems today and are at the heart of some of Africa's most enduring conflicts. Moreover, the inability of African states to contain the threat of extremism or of heavy-handed security responses has led to the loss of thousands of lives, displaced millions, and deeply impacted the continent's democratisation and development goals. This is the second anthology published by Good Governance Africa (GGA) on the topic of extremism and political violence in Africa. *Extremisms in Africa*, one of the first anthologies of its kind on this topic to be authored and published on the African continent, provided an account of how extremist groups arose in Africa and the various ways in which they have harnessed their global agendas to local conflict dynamics and structural challenges, enabling them to exploit the grievances of individuals and communities for their cause. This anthology, *Extremisms in Africa Volume 2*, looks forward, giving special attention to the ways in which emergent trends in global geopolitics and conflict dynamics merge to impact upon the African continent. To this end, we have sought to engage diverse topics ranging from ecological concerns surrounding climate change and migration, the implications of such human movement for modern-day trafficking and slavery, and the roles of women and youth. State responses to extremism on the African continent are not uniform; the capacity of individual states to detect, identify, police, investigate, and prosecute is highly variable. At the most fundamental level, extremism is ripe to arise in contexts where governments are failing, especially when democracy is on the wane. This anthology identifies some of the most pressing challenges in addressing extremism today and provides chapters that could offer actionable policy insights to governments and civil society. Given the nature of Africa's geopolitical landscape, state and security services alone cannot prevent extremism. It will take a whole-of-society approach where government, civil society, academia, communities, families, and individuals collaborate to better understand the local dynamics of recruitment and radicalisation and develop context-

specific strategies in response This anthology will hopefully provide practitioners with improved insight into some of the key challenges and potential solutions in preventing extremism while also being of interest to the general reader *Handbook of Neurotoxicity* Richard M. Kostrzewa,2023-01-02 This handbook is a reference source for identifying characterizing instructing on use and describing outcomes of neurotoxin treatments to understand mechanisms associated with toxin use to project outcomes of neurotoxin treatments to gauge neurotoxins as predictors of events leading to neurodegenerative disorders and as aids to rational use of neurotoxins to model disease entities Neuroprotection is approached in different manners including those 1 afforded by therapeutic agents clinical and preclinical or 2 by non drug means such as exercise The amorphous term neurotoxin is discussed in terms of the possible eventuality of a neuroprotectant producing an outcome of excess neuronal survival and a behavioral spectrum that might produce a dysfunction akin to a neurotoxin s effect This new edition significantly expands on the information provided in the first edition providing the latest research in neurotoxicity and highlighting the relationship between specific neurotoxins and the neurodegenerative disorders they can cause It also includes new sections on the neurotoxicity of heavy metals fungi and snake venom The Handbook of Neurotoxicity is thus an instructive and valuable guide towards understanding the role of neurotoxins neurotoxicity in the expansive field of Neuroscience and is an indispensable tool for laboratory investigators neuroscientists and clinical researchers **Handbook of Brewing** Hans Michael Eßlinger,2009-04-22 This comprehensive reference combines the technological know how from five centuries of industrial scale brewing to meet the needs of a global economy The editor and authors draw on the expertise gained in the world s most competitive beer market Germany where many of the current technologies were first introduced Following a look at the history of beer brewing the book goes on to discuss raw materials fermentation maturation and storage filtration and stabilization special production methods and beermix beverages Further chapters investigate the properties and quality of beer flavor stability analysis and quality control microbiology and certification as well as physiology and toxicology Such modern aspects as automation energy and environmental protection are also considered Regional processes and specialties are addressed throughout the entire book making this a truly global resource on brewing **Handbook of Microalgal Culture** Amos Richmond,Qiang Hu,2013-04-03 Algae are some of the fastest growing organisms in the world with up to 90% of their weight made up from carbohydrate protein and oil As well as these macromolecules microalgae are also rich in other high value compounds such as vitamins pigments and biologically active compounds All these compounds can be extracted for use by the cosmetics pharmaceutical nutraceutical and food industries and the algae itself can be used for feeding of livestock in particular fish where on going research is dedicated to increasing the percentage of fish and shellfish feed not derived from fish meal Microalgae are also applied to wastewater bioremediation and carbon capture from industrial flue gases and can be used as organic fertilizer So far only a few species of microalgae including cyanobacteria are under mass cultivation The potential for expansion is enormous considering the
