## Student Exploration: Populations and Samples

**Readings:** Frequency distribution, normal distribution, population, sample

**Prior Knowledge Questions** (What do you already know about this topic?)

a. **Frequency distribution** indicates how many times some value occurs within a group of values. Suppose a large number of people were surveyed on how many hours per week they can work. The frequency of that data shows the frequency distribution of that variable, without sampling.

b. How would you approximate shape of the distribution?

\_\_\_\_\_

\_\_\_\_\_

c. In the graph given at right, which value gives more the frequency distribution might give that the same people could describe the number hours working per week?

**Classroom Activity**

In many cases, a frequency distribution is skewed to the right or left. This is because the distribution is skewed to the right or left. This is because the distribution is skewed to the right or left. This is because the distribution is skewed to the right or left.

a. The normal distribution is the distribution of the frequency distribution. The normal distribution is the distribution of the frequency distribution.
