Treat or

Trick? Halloween in a Globalising World Malcolm Foley, Hugh O'Donnell, 2008-12-18 In 1999 the French bishops condemned the celebration of Halloween in France In 2003 the Moscow Department of Education recommended the banning of Halloween celebrations in all educational institutions under its control In 2008 a group of Catalan intellectuals launched an internet petition against the Halloween celebrations organised by the Port Aventura theme park arguing that they were detrimental to long standing Catalan traditions associated with 31 October In the meantime children and young people all over Europe and increasingly adults are energetically adopting and adapting the American version of Halloween as a source of fun community building and general revelry So are we all being tricked by rampant cultural imperialism or responding creatively to the arrival of Halloween as a welcome onset of winter treat This book which arose out of the first ever conference on the topic of Halloween held in Glasgow Scotland on 31 October 2006 brings together a series of studies examining the phenomenon of Halloween from a wide range of perspectives its origins the ways in which it is now and has been in the past celebrated in the British Isles its spectacular arrival in both Eastern and Western Europe over the last two decades its links with tourism and its multifaceted presence in the media What emerges is a phenomenon of astonishing complexity characterised by multiple meanings and intense battles over ownership

Post-Growth Work Irmi Seidl, Angelika Zahrnt, 2021-09-08 This book argues that society must rethink the notion of formal employment and instead introduce and spread the notion of meaningful work so that societies can become independent of economic growth The excessive consumption of natural resources and the immense emissions resulting from our growth oriented economic system surpass the planetary boundaries Despite this society and the economy still strive for economic growth in order to generate jobs to finance the social security system and to assure tax income However these expectations are increasingly unrealistic not least because technological developments such as digitalisation and robotisation will change and limit formal employment opportunities as well Against this backdrop the book introduces the notion of meaningful activities that embrace various kinds of work paid and unpaid sequential or in parallel which are meaningful for the worker as well as society as a whole At the same time the authors argue in favour of reduced working time in formal employment Furthermore the book also describes the necessary transformations in companies and for consumers for social and tax systems for social services and agriculture Innovative and timely this book will be a key resource for professionals and scholars interested in sustainability economics work transformation and post growth studies

Lev Vygotsky René van der Veer, 2007-11-15 Lev Vygotsky the great Russian psychologist had a profound influence on educational thought His work on the perception of art cultural historical theory of the mind and the zone of proximal development all had an impact on modern education This text

provides a succinct critical account of Vygotsky's life and work against the background of the political events and social turmoil of that time and analyses his cross cultural research and the application of his ideas to contemporary education Ren van der Veer offers his own interpretation of Vygotsky as both the man and anti man of educational philosophy concluding that the strength of Vygotsky's legacy lies in its unfinished open nature *John Henry Newman* James Arthur, Guy Nicholls, 2007-11-15 John Henry Newman's writings and his lifelong search for religious truth continue to influence thought within a range of disciplines most notably theology philosophy and education One of his most significant contributions was to the understanding of higher education contained within his nineteenth century writings in particular his volume of lectures entitled *The Idea of a University* which has helped shape religious and educational thought over two centuries Newman's claim that university education the pursuit of universal knowledge and truth is as much an education in pure and practical knowledge as in moral life provides a continuing source of challenge and inspiration to education leaders today much as it did in the nineteenth century James Arthur examines Newman's key strengths and weaknesses and locates these firmly within the intellectual context of his time providing an overview of his work that allows students to appreciate the importance of his thought both within and outside the Catholic tradition
