ever Samsung built the Galaxy Note brand on delivering the best big screen phones around The 6.3 inch Note 10 is one of the most compact big screen phones yet thanks to its nearly bezel free Infinity O screen and some features Samsung left on the cutting room floor The Note 10 also boasts several S Pen enhancements including gestures a better camera for video recording outstanding hardware excellent battery life and an easier way to mirror the phone on a PC However these devices pack so much inside that setting up and personalizing your Galaxy Note 10 can be an intimidating process especially if you don't know where the pertinent settings can be found For instance all the phone's buttons are on the left side of the Note 10 plus Pressing and holding the power button activates Bixby instead of offering power options So there is a learning curve in getting used to the Note 10 Plus layout This complete step by step guide will guide you through all the basics and advance tips and tricks to master your device like a pro Add this guide to your library now and make the most of your device
