On Course Plus Edition:

A Five-Year Study of the First Edition of the Core-Plus Mathematics Curriculum Harold Schoen, Steven W. Ziebarth, Christian R. Hirsch, Allison BrckaLorenz, 2010-07-01 The study reported in this volume adds to the growing body of evaluation studies that focus on the use of NSF funded Standards based high school mathematics curricula Most previous evaluations have studied the impact of field test versions of a curriculum Since these innovative curricula were so new at the time of many of these studies students and teachers were relative novices in their use These earlier studies were mainly one year or less in duration Students in the comparison groups were typically from schools in which some classes used a Standards based curriculum and other classes used a conventional curriculum rather than using the Standards based curriculum with all students as curriculum developers intended The volume reports one of the first studies of the efficacy of Standards based mathematics curricula with all of the following characteristics The study focused on fairly stable implementations of a first edition Standards based high school mathematics curriculum that was used by all students in each of three schools It involved students who experienced up to seven years of Standards based mathematics curricula and instruction in middle school and high school It monitored students mathematical achievement beliefs and attitudes for four years of high school and one year after graduation Prior to the study many of the teachers had one or more years of experience teaching the Standards based curriculum and or professional development focusing on how to implement the curriculum well In the study variations in levels of implementation of the curriculum are described and related to student outcomes and teacher behavior variables Item data and all unpublished testing instruments from this study are available at www.wmich.edu/cpmp for use as a baseline of instruments and data for future curriculum evaluators or Core Plus Mathematics users who may wish to compare results of new groups of students to those in the present study on common tests or surveys Taken together this volume the supplement at the CPMP Web site and the first edition Core Plus Mathematics curriculum materials samples of which are also available at the Web site serve as a fairly complete description of the nature and impact of an exemplar of first edition NSF funded Standards based high school mathematics curricula as it existed and was implemented with all students in three schools around the turn of the 21st century

NeuroLogic Eliezer Sternberg,2016-01-12 A groundbreaking investigation of the brain s hidden logic behind our strangest behaviors and of how conscious and unconscious systems interact in order to create our experience and preserve our sense of self From bizarre dreams and hallucinations to schizophrenia and multiple personalities the human brain is responsible for a diverse spectrum of strange thoughts and behaviors When observed from the outside these phenomena are often written off as being just crazy but what if they were actually planned and logical *NeuroLogic* explores the brain s

internal system of reasoning from its unconscious depths to conscious decision making and illuminates how it explains our most outlandish as well as our most stereotyped behaviors From sleepwalking murderers contagious yawning and the brains of sports fans to false memories subliminal messages and the secret of ticklishness Dr Eliezer Sternberg shows that there are patterns to the way the brain interprets the world patterns that fit the brain s unique logic Unraveling these patterns and the various ways they can be disturbed will not only alter our view of mental illness and supernatural experience but will also shed light on the hidden parts of ourselves With black and white illustrations throughout
