Planning on the Edge Nick Gallent, Johan Andersson, Marco Bianconi, 2006-09-27 More than a tenth of the land mass of the UK comprises urban fringe the countryside around towns that has been called planning's last frontier One of the key challenges facing spatial planners is the land use management of this area regarded by many as fit only for locating sewage works essential service functions and other un neighbourly uses However to others it is a dynamic area where a range of urban and rural uses collide *Planning on the Edge* fills an important gap in the literature examining in detail the

challenges that planning faces in this no man's land. It presents both problems and solutions and builds a vision for the urban fringe that is concerned with maximising its potential and with bridging the physical and cultural rift between town and country. Its findings are presented in three sections: the urban fringe and the principles underpinning its management; sectoral challenges faced at the urban fringe including commerce, energy, recreation, farming and housing; managing the urban fringe more effectively in the future. Students, professionals and researchers alike will benefit from the book's structured approach while the global and transferable nature of the principles and ideas underpinning the study will appeal to an international audience.

Living on the Edge Thomas N. Wisley, 2019-07-10 *Living on the Edge* is risky advice for living an adventurous life. I begin with a brief sketch about my life and the influences that took me in the direction it did. I discuss communication models and paradigms that have helped me live in cross-cultural risky environments. I learned to validate people without endorsing values that are counter to my own. I've learned how to create a space to put things I haven't understood or about which I didn't yet have enough information to make an informed decision. I've learned that it's not a bad thing to be a child of the light in times of darkness. These and more comprise advice, some of it risky. I'd like to give my millennial friends. I suggest that God is the great Recycler and that he doesn't make junk and there's more.

Families on the Edge Elizabeth Carpenter-Song, 2023-08-15 An intimate account of rural New England families living on the edge of homelessness as well as the practices and policies of care that fail them. *Families on the Edge* is an ethnographic portrait of families in rural and small town New England who are often undercut by the very systems that are set up to help them. In this book, author and medical anthropologist Elizabeth Carpenter Song draws on a decade of ethnographic research to chart the struggles of a cohort of families she met in a Vermont family shelter in 2009 as they contend with housing insecurity, mental illness and substance use. Few other works have attempted to take such a long-term view of how vulnerability to homelessness unfolds over time or to engage so fully with existing scholarship in the fields of anthropology and health services. Research on homelessness in the United States has been overwhelmingly conducted in urban settings so much less is known about its trajectory in rural areas and small towns. Carpenter Song's book identifies how specific aspects of rural New England including scarce affordable housing, stock, extremely limited transportation and cultural expectations of self-reliance come together to thwart opportunities for families despite their continual striving to make it in this environment. Carpenter Song shines a light on the many high-stakes consequences that occur when systems of care fail and offers a way forward for clinicians, health researchers and policymakers seeking practical solutions.

Living on the Edge Jeff Corwin, 2003-11-08 Get rid of it for gosh sakes. Get rid of it, my aunt barked when she spied the garter snake latched onto my six-year-old arm. I then responded with No. That's when everyone went silent until my aunt spoke out once again. What do you mean no? Why not? As the tears continued to stream down my face, I answered back through an exaggerated and convulsing huff. Because I love it. It was then that Jeff Corwin was hooked. Whether it's serpents, lizards, crocs or frogs or any number of

furry creatures Jeff has spent decades learning and educating about the world's most diverse ecosystems and their inhabitants Travel with him now through Arizona Africa Costa Rica and Venezuela to encounter those who are familiar coyotes elephants anteaters and crocodiles and meet those who aren't the vinegaroon which keeps out of harm's way by gagging and repelling potential predators with caustic fumes painted dogs which allow only one monogamous pair within the clan to breed the omnivorous kinkajou which helps propagate the enormous strangler fig tree and capybaras the world's largest rodents who happen to be excellent swimmers Bear witness to the codependency of all these creatures on either the plants that surround them or each other and look behind the scenes to see Jeff's coming of age in the world of biodiversity Some of the fabulous creatures in these pages are in danger of becoming extinct while all carry a vital role in maintaining these ecosystems Without the interplay of predator prey and symbiotic communalism the world as we know it would be a vastly different place
