On Line Application At Biust:

AI Applications and Pedagogical Innovation Wang, Viktor, 2025-07-11 AI is rapidly transforming education offering more opportunities for pedagogical innovation By integrating AI tools and systems into teaching and learning environments educators can now personalize instructions and enhance student engagement As educational institutions continue to explore the potential of AI it becomes increasingly important to understand how these innovations can be harnessed to improve learning outcomes and reshape traditional pedagogical models AI Applications and Pedagogical Innovation explores the transformation of AI in the educational field This book provides a critical lens on equity and access encouraging the development of inclusive AI driven solutions that benefit diverse learners worldwide Covering topics such as AI education and technology this book is an excellent resource for researchers educators administrators policymakers instructional designers academicians and more

Advancements in Artificial Intelligence, Blockchain Technology, and IoT in Higher Education Subhendu Kumar Pani, Kamalakanta Muduli, Sujoy Kumar Jana, Srikanth Bathula, Golam Sarwar Khan, 2023-06-23 With a need to find alternatives to the traditional face to face teaching and learning during the pandemic this topical volume discusses the best use of technologies in higher education addressing the growing role of AI in the digital transformation of higher education systems With chapters from eminent professors researchers and others involved in higher education from a selection of different countries the volume looks at blockchain and IoT technologies to create smart universities now and for the future

Applications in Plant Biotechnology Abdullah Makhzoum, Kathleen Hefferon, 2022-12-23 The book focuses on interesting topics in plant biotechnology and its applications The first section covers a number of specific medicinal plants and their secondary metabolites using genetic and metabolic engineering The pharmaceutical uses of these plant bioactive compounds and their applications in treating a variety of diseases including cancer as well as recent works on in silico and bioinformatic analysis are described The second section deals with innovative plant molecular pharming approaches and reviews the potential for using various plant host systems to design and produce effective new drugs to treat different illnesses and diseases such as HIV infectious diseases and other human and livestock diseases

The 4th Asia Conference on Material and Manufacturing Technology and the 6th International Conference on Nanomaterials and Biomaterials Steven Y. Liang, Zongjin Li, 2023-07-17 Selected peer reviewed extended articles based on abstracts presented at the 4th Asia Conference on Material and Manufacturing Technology ACMMT 2022 and the 6th International Conference on Nanomaterials and Biomaterials ICNB 2022 Aggregated Book

Advanced Process Engineering Control Paul Serban Agachi, Mircea Vasile Cristea, Alexandra Ana Csavdari, Botond Szilagyi, 2023-11-20 As a mature topic in chemical engineering the book provides methods problems and tools used in process control engineering It discusses process knowledge sensor system technology actuators communication technology and logistics design and construction of control systems and their operation The knowledge goes beyond the traditional process engineering field by

applying the same principles to biomedical processes energy production and management of environmental issues The book explains all the determinations in the chemical systems or process systems starting from the beginning of the processes going through the intricate interdependency of the process stages analyzing the hardware components of a control system and ending with the design of an appropriate control system for a process parameter or a whole process The book is first addressed to the students and graduates of the departments of Chemical or Process Engineering Second to the chemical or process engineers in all industries or research and development centers because they will notice the resemblance in approach from the system and control point of view between different fields which might seem far from each other but share the same control philosophy

Manufacturing Processes, Intelligent Methods and Systems in Production Engineering Andre Batako, Anna Burduk, Kanisius Karyono, Xun Chen, Ryszard Wyczółkowski, 2022-04-19. This book forms an excellent basis for the development of intelligent manufacturing systems for Industry 4.0, digital and distributed manufacturing and factories for the future. This book of new developments and advancement in intelligent control and optimization systems for production engineering serves as a good companion to scholars, manufacturing companies and RTOs to improve the efficiency of production systems. LONDON SOCIETY AN ILLUSTRATED MAGAZINE OF LIGHT AND AMUSING LITERATURE FOR

THE HOURS OF RELAXATION, 1869 **Data-Driven Optimization of Manufacturing Processes** Kalita, Kanak, Ghadai, Ranjan Kumar, Gao, Xiao-Zhi, 2020-12-25. All machining processes are dependent on a number of inherent process parameters. It is of the utmost importance to find suitable combinations to all the process parameters so that the desired output response is optimized. While doing so may be nearly impossible or too expensive by carrying out experiments at all possible combinations, it may be done quickly and efficiently by using computational intelligence techniques. Due to the versatile nature of computational intelligence techniques, they can be used at different phases of the machining process design and optimization process. While powerful machine learning methods like gene expression programming, GEP, artificial neural network, ANN, support vector regression, SVM and more can be used at an early phase of the design and optimization process to act as predictive models for the actual experiments, other metaheuristics-based methods like cuckoo search, ant colony optimization, particle swarm optimization and others can be used to optimize these predictive models to find the optimal process parameter combination. These machining and optimization processes are the future of manufacturing. **Data-Driven Optimization of Manufacturing Processes** contains the latest research on the application of state-of-the-art computational intelligence techniques from both predictive modeling and optimization viewpoints in both soft computing approaches and machining processes. The chapters provide solutions applicable to machining or manufacturing process problems and for optimizing the problems involved in other areas of mechanical, civil and electrical engineering, making it a valuable reference tool. This book is addressed to engineers, scientists, practitioners, stakeholders, researchers, academicians and students.

interested in the potential of recently developed powerful computational intelligence techniques towards improving the performance of machining processes *Reports of Cases Determined in the District Courts of the State of California* Henry Jacob Labatt, 1858
