Siwan Anderson, Lori Beaman, Jean-Philippe Platteau, 2018-10-22 As a result of widespread mistreatment and overt discrimination women in the developing world often lack autonomy Towards Gender Equity in Development brings together leading scholars working on gender issues to explore key sources of female empowerment and discuss the current challenges and opportunities for the future Exploring three key domains this book adopts a clear multi disciplinary approach to present different perspectives from gender focused economics and social research It covers marriage and women s relative bargaining position within the household the options available to women outside of marriage and in the context of their community and overarching discriminatory laws and cultural norms It engages with questions of how marriage divorce and remarriage practices have evolved and with what effects for women how female empowerment can benefit from improving options and economic and collective action opportunities and how the government can act as a lawmaker to contribute to modifying norms and practices that disadvantage women Equality for Women = Prosperity for All Augusto Lopez-Claros, Bahiyyih Nakhjavani, 2018-10-30 A groundbreaking book about the direct relationship between a woman s rights and freedoms and the economic prosperity of her country The authors speak to hearts as well as minds Maud de Boer Buquicchio UN Special Rapporteur Not only timely but profoundly important a must read Jackie Jones Professor of Feminist Legal studies Gender discrimination is often seen from a human rights perspective it is a violation of women s basic human rights as embedded in the Universal Declaration the UN Charter and other such founding documents Moreover there is overwhelming evidence that restrictions and various forms of discrimination against women are also bad economics They undermine the talent pool available to the private sector they distort power relationships within the family and lead to inefficiencies in the use of resources They contribute to create an environment in which women de facto are second class citizens with fewer options than men lower quality jobs lower pay often the victims of various forms of violence literally from the cradle to the grave They are also not fully politically empowered and have scant presence in the corridors of power whether as finance ministers central bank governors prime ministers or on the boards of leading corporations Why is gender inequality so pervasive Where does it come from Does it have cultural and religious roots And what are the sorts of policies and values that will deliver a world in which being born a boy or a girl is no longer a measure of the likelihood of developing one s human potential **Global Equity in Administration** Susan Gooden, 2020-07-14 Governments around the world face the challenge of espousing principles of fairness but practicing inequity in their administration Issues of equity and justice are fundamental concerns of government and thus to public administrators who constantly struggle to evaluate a country s

social climate and ensure equity in governance Such evaluation is unlikely to occur in a serious way however if government actors are fundamentally too uncomfortable to directly engage the topic The result this book argues is a context of nervousness which unless squarely acknowledged and addressed can become debilitating and thwart progress toward achieving social equity This volume explores and expands our understanding of the concept of nervousness in the administration of government services around the world demonstrating the ways in which such an emotional and physical reaction can debilitate government actions that are needed to promote social equity and justice Each of the chapters in this edited volume focuses on a single country and examines a specific nervous area of government highlighting important historical and political considerations as well as specific evidence of promising progress It considers the complexity of nervous areas of governments around the world while identifying encouraging approaches and initiatives Global Equity in Administration is required reading for all practicing and aspiring public servants concerned with fair and equitable provision of public services around the world

Economic Woman Frances Raday, 2019-05-14 The author introduces the concept of economic woman and makes her visible in duality with and opposition to the exclusive model of economic man Economic man has epitomized neo liberal capitalism which embraces competition and maximization of profit resulting in a steep increase in economic inequality The book demonstrates that women s inequality is a crucial factor in economic inequality which cannot be fully understood without relating to women s situation and that economic woman cannot thrive in the conditions of economic inequality created under global neo liberalism Emphasising the international human rights guarantees of women s right to equality in

all fields of life the author documents woman s increased participation in political public financial and corporate institutions employment and entrepreneurship with some women reaching high profile positions Nevertheless using global data she reveals that economic woman lags behind with a severe economic power deficit an unfulfilled promise of equal employment opportunity a gendered impact of poverty and barriers to gender equality in the family The book analyses the trap of women s increased burden of breadwinning in the context of discriminatory laws and practices infrastructural failures and policy gaps which preempt achievement of gender equality in economic life The book is intended for the general reader academics students policy makers and NGOs It shows economic woman at a global crossroads between a universal paradigm of gender equality and pervasive barriers to equal economic opportunity The author demonstrates that tackling gender inequality restoring welfare priorities and reducing economic inequality are inextricably linked Human rights and governments have a vital role to play in addressing them all to create a sustainable economic infrastructure for the lives of women and men

Everyday Masculinities in 21st-Century China Magdalena Wong, 2020-05-04
Everyday Masculinities in 21st Century China The Making of Able Responsible Men argues that a moral dimension in Chinese masculinity is of growing significance in fast changing China Able responsible men those who can create wealth and shoulder responsibilities have replaced the moneyed elite of the earlier reform and opening up era as the dominant male ideal With vivid and highly readable case studies Wong presents a compelling account of the forces that coerce men to live up to the able responsible standard She demonstrates the impact this pressure has on the lives of not only boys and men but also on women and shows how it invites both complicit and resistant reactions The book lays bare the socio political context that nurtures the cultural expressions of hegemonic masculinity under the rule of Xi Jinping The president himself has emerged in public consciousness as the embodiment of the ideal able responsible man Based on anthropological fieldwork in Nanchong Sichuan the book provides new perspectives on many topical issues that China faces These include urbanization labour migration the one child policy love and marriage gender and intergenerational dynamics hierarchical male relationships and the rise of mass displays of nationalism In this richly informative book Dr Wong gives us an intimate picture of masculinities in a contemporary Chinese city She explores the role of wealth in definitions of masculinity the moral dimension in gender imagery the changing desires of women and the role of the state including a striking account of the gender strategies of President Xi More than a local study this book provides valuable ideas for understanding gender men and masculinities in the contemporary world Raewyn Connell University of Sydney

People Who Count Dorothy Stein, 2023-10-02
Originally published in 1995 this book confronts the contentious political issues on all sides of the population debate including immigration demographic competition gender ratios reproductive research and children s rights The book argues that lower fertility rates are preferred by women themselves are beneficial in their own right to both women and children and should not be used as a bargaining chip in any other area of the development debate Drawing on a large body of research in anthropology child psychology and population studies the book presents evidence that the poor do not necessarily have large families as form of financial security or to put them to work people without offspring are less lonely in old age immigration and refugee controls in the Northern Hemisphere have been more driven by politics than rational calculation and human rights social security does not require a large cohort of young workers This book is a challenging contribution to the development debate It presents a persuasive

case for policies which recognise hopeful trends in relieving the environmental and social pressures of a globally increasing population Contemporary China Review [2024 Spring/Summer Issue] Journal Editors, 2024-07-25 As the Year 2024 has already passed half I sincerely hope and pray for world peace and for people to live and work in peace But looking ahead I believe the future will still not be peaceful The Russian Ukrainian war is still raging and the people are suffering The Israeli Hamas conflict seems to have no signs of stopping and the US election is surging As I said before the three major divisions facing the world are presented at the same time this year the Russian Ukrainian war is a major division between the democratic and dictatorial camps the US election is a major left right division and the Israeli Hamas conflict has surpassed the left right division and the democracy dictatorship division Is the world heading for doomsday We wait and see
