This book traces the historical lineages of Alvin Plantinga's religious epistemology from Plato through Augustine and Calvin. It focuses upon this epistemology as a philosophical interpretation of what is generally taken to be a narrow theological doctrine. The author provides a textually based and closely reasoned introduction to the epistemological ideas of Plato, Augustine, Calvin, Plantinga, and several other writers and shows the continuity of a certain approach to the knowledge of God; it may be called the Platonic-Augustinian-Reformed or Calvinist approach.

Apologetics beyond Arguments Emil Børty Nielsen, Christian apologetics is often seen as the art of defending the truth of the Christian faith through arguments. As a result, most books focus on debating evidence. *Apologetics Beyond Arguments* breaks new ground by addressing a critical gap: the lack of methodological reflection in the field. This book presents a fresh meta-apologetic framework redefining apologetics as the practice of Christian persuasion. By doing so, it opens the door to new insights and questions drawn from fields such as rhetoric, psychology, and ethics, bridging the gap between sound arguments and effective persuasion.
