Remote Sensing of Land Cover and Land Use Changes in South and Southeast Asia, Volume 1 Krishna Prasad Vadrevu, Christopher Justice, Garik Gutman, 2025-07-22

South and Southeast Asian countries are experiencing rapid land cover and land use changes LCLUC due to urbanization agricultural expansion deforestation and infrastructure development These changes have far reaching consequences for biodiversity water resources food security and climate regulation underscoring the urgent need for effective monitoring and management strategies Remote sensing data is essential for mapping and monitoring these changes A variety of remote sensing data ranging from coarse to very high resolution can be used to assess land use patterns and quantify changes Volume 1 showcases the practical utility of remote sensing data in various LCLUC studies The book features contributions from the NASA funded South Southeast Asia Research Initiative and collaborators from multiple countries in South and Southeast Asia Key Features Explores the latest methodologies from deep learning to novel data integrations for mapping LCLUC Demonstrates case studies to monitor and map land cover changes using very high medium and coarse resolution

satellite data Highlights the role of remote sensing in integrating biophysical and socioeconomic data Provides case studies on urban expansion deforestation and agricultural intensification Demonstrates advanced remote sensing methods for tracking land use changes Offers insights into sustainable land management using remote sensing and geospatial technologies This book serves as a cornerstone for advancing research and collaboration in the field of remote sensing and land use studies particularly in South and Southeast Asia It will be an invaluable resource for mapping and monitoring professionals including remote sensing experts geographers environmental scientists ecologists and all others involved in land use cover change research

Land-Atmospheric Research Applications in South and Southeast Asia Krishna Prasad Vadrevu,Toshimasa Ohara,Chris Justice,2018-03-26 This edited volume sheds new light on the impact of rapid Land Use Cover Changes LU CC on greenhouse gases GHG s and aerosol emissions in South and Southeast Asia Several countries in South Southeast Asia have the highest population growth rates in the world which is the main cause for LU CC Conversion of dense forests to agricultural areas and then to residential and urban areas is most commonly observed in South Southeast Asian countries with a significant release of GHG s and aerosols The book showcases several case studies on the use of remote sensing and geospatial technologies to quantify biomass burning and air pollution impacts aerosol pollution LU CC and impacts on ecosystem services The book also includes articles on regional initiatives in research capacity building and training The authors of this book are international experts in the field and their contributions highlight significant drivers and impacts of air pollution in South Southeast Asia Readers will discover the latest tools and techniques in particular the use of satellite remote sensing and geospatial technologies for quantifying GHG s aerosols and pollution episodes in this region

Extreme Habitable Environments Madhu Kashyap Jagadeesh,Usha Shekhar,2022-07-07 Extreme Habitable Environments is a book authored with the intention of providing introductory material suitable for those interested in learning about exoplanets The focal point of this book is to expose its readers to the excitement in identifying exoplanets and exploring the possibility of life on them This book offers structured content enriched with graphics flow charts images and worked examples that make reading and learning a delight This book further serves as a hands on perspective of the solar system and exoplanets The first two chapters give a thorough insight into the solar system replete with the dynamics of star and planet formation Exoplanets are introduced in the third chapter Remaining chapters deal with various aspects of exoplanets in a phased manner Every chapter starts with an inspirational quote by a renowned personality Content for every chapter is written in a down to earth style to facilitate readers understanding and appreciation of the fundamental concepts While some topics are basically descriptive others start with a simple concept and progressively become more rigorous and detailed Every effort has been made to make each chapter as complete as possible with a view of inciting curiosity in the minds of the readers and motivating them towards additional knowledge acquisition Numerical exercises are included at the end of relevant chapters to help readers develop independent thinking logical analysis and deductive skills It is hoped that this book
