

Plants Study Guide

Plant Parts and Functions:

Seed-producing plants generally have four basic structures, or parts, that perform certain functions.

- **Roots** anchor the plant and take in water and nutrients from the soil.
- The **stem** provides support and moves water and nutrients throughout the plant.
- **Leaves** carry out photosynthesis and make food for the plant.
- **Flowers** allow the plant to reproduce. They attract pollinators and produce seeds.

Photosynthesis:

Green plants produce their own food through a chemical process called **photosynthesis**. This process takes place inside the plant's leaves. The leaves contain a pigment called **chlorophyll**. Chlorophyll traps sunlight inside the leaves. Carbon dioxide also enters the leaves through tiny holes called stomata. During photosynthesis, the plant uses the sunlight, carbon dioxide, and water to make its own food (in the form of sugar). The plant also produces oxygen, which it releases as a waste product.

sunlight + carbon dioxide + water = sugar and oxygen

Green plants are very different than animals because they are able to use energy from the sun to make their own food. They are called producers, and they are the first step in most food chains.

Plants Study Guide For Kids

Christian G. Meyer

Plants Study Guide For Kids:

Texas Outdoor Adventure Guide for Kids Melissa Maupin,1998 Lists and describes places in Texas that have outdoor programs for kids covering fishing and shooting sports water recreation bird and wildlife watching nature study volunteer activities and camping each with contact information *A Kid's Guide to Making a Terrarium* Stephanie Bearce,2009-09 Learn how to make a working water cycle and how to grow tropical plants Get messy digging in the dirt Have fun treasure hunting for the perfect container and building your own secret world Be a scientist and study how plants grow or use your imagination to create a world for dinosaurs It s all possible when you learn how to make your own terrarium

Schoolyard-Enhanced Learning Herbert W. Broda,2023-10-10 Schoolyard Enhanced Learning Using the Outdoors as an Instructional Tool K 8 shows how the school grounds regardless of whether your school is in an urban suburban or rural setting can become an enriching extension of the classroom In this comprehensive handbook Herb Broda blends theory and practice providing readers with practical suggestions and teacher tested activities for using the most powerful audio visual tool available the outdoors Emphasizing the practical this innovative book offers teachers step by step guidance to help ensure success when they take a class outside It provides Background that helps present the case for outdoor learning educational theory that supports the concept overview of the terminology research on the benefits related to student achievement alignment of outdoor learning with current teaching practices Ideas for making the schoolyard an effective outdoor classroom the planning process enhancing and maintaining the site developing gardens and attracting wildlife finding community resources and funding Advice on working with a class outdoors garnering administrative and parental support considerations before going out making the most of your outdoor time using GPS as an educational tool building on the outdoor experience back in the classroom An array of proven activities that utilize the schoolyard activities related to specific subject areas activities that teach process skills activities that encourage initiative and build community At a time when children s natural curiosity about the outdoors is eclipsed by the demands of busy schedules and the ever present glow of video screens schools may be the only place where they are encouraged to interact with nature Schoolyard Enhanced Learning can help teachers unlock the powerful learning experiences that exist just beyond the classroom door
