

## Population Distributions

How does population distribution affect the outcome?

Why?

Alaska encompasses 57 million acres of unoccupied forest land, it is the largest state in the United States, yet with a population of under 700,000 people there are some interesting patterns in Alaska's forest. How many of each forest type and forest size are present in each of the 17 million forest acres? (Percent of the 17-million forest land acres are unoccupied, unmanaged.) What are the reasons for the high proportion of unoccupied, unmanaged forest acres in Alaska?
