Group - The periodic table also has a special name for its vertical columns. Each column is called a group. The elements in each group have the same number of electrons in the outer orbital. Those outer electrons are also called valence electrons

Ion – Atom or molecule with a net electrical charge

Polyatomic Ion - A polyatomic ion, also known as a molecular ion, is a **charged** chemical species composed of two or more atoms covalently bonded

Solution – A homogeneous mixture of two or more substances, with a minor substance being uniformly distributed in a major substance.
