Mortal Minds Gerald M. Woerlee, 2010-06-03 With its easy to read and personal style this book provides some intriguing new explanations of the physiology of death and the dying experience Susan Blackmore PhD Author of *Dying to Live* Dying is the last conscious experience undergone by each person But what do the dying experience In the last few decades a good deal of publicity has surrounded people who have been close to death and then reported intense experiences that seem to suggest a supernatural existence beyond death Does the conscious mind somehow continue to exist after the body has passed away *Mortal Minds* answers these questions Dr G M Woerlee explains how the normal functioning of the human body near death can generate beliefs in the reality of the supernatural and life after death An anesthesiologist with more than twenty years of hospital experience Dr Woerlee has been struck over the years by the similarities between the body's symptoms under anesthesia and its reactions near death Among the issues he addresses are the sensations of being disembodied that those near death often describe the perception that mind and body are separate components of existence whether there is such a thing as a soul the physical effects of decreased oxygen to the brain and the visions that the dying sometimes report from rapturous experiences of eternal peace to diabolical dreams While not dismissing near death experiences as mere hallucinations Dr Woerlee is also careful to point out that even powerful psychological impressions by themselves do not constitute scientific proof of life after death Taking this balanced objective stance he succeeds in conveying a better understanding of the dying process and helping us all to realize the nature of these final experiences G M Woerlee Leiden The Netherlands is an anesthesiologist affiliated with the Rijnland Hospital in Leiderdorp The Netherlands and the author of two books on anesthesiology
