Solanaceae, Biology and Systematics William G. D'Arcy, 1986 This book explores the puzzling phenomenon of new veiling practices among lower middle class women in Cairo Egypt Although these women are part of a modernizing middle class they also voluntarily adopt a traditional symbol of female subordination How can this paradox be explained An explanation emerges which reconceptualizes what appears to be reactionary behavior as a new style of political struggle as accommodating protest These women most of them clerical workers in the large government bureaucracy are ambivalent about working outside the home considering it a change which brings new burdens as well as some important benefits At the same time they realize that leaving home and family is creating an intolerable situation of the erosion of their social status and the loss of their traditional identity The new veiling expresses women's protest against this MacLeod argues that the symbolism of the new veiling emerges from this tense subcultural dilemma involving elements of both resistance and acquiescence

The Family Emotional System Robert J. Noone,, Daniel V. Papero, 2015-10-30 The Family Emotional System An Integrative Concept for Theory Science and Practice presents an ongoing dialogue among scientists family investigators and clinicians related to a natural systems view of the family and human behavior that has been occurring over several decades The concept of the family as an emotional system as defined in Bowen theory is presented as the principal integrative concept underlying this dialogue and an effort to move toward a science of human behavior As a natural system the family forms the immediate and most important context for individual development and may be the most central and important environment shaping brain development across the lifetime of the individual This book explains how the family system can serve as an integrative framework within which specific factual discoveries and hypotheses from many areas of science can be brought together and understood as various manifestations of a coherent whole The Family Emotional System provides understanding of what is entailed in conceptualizing the family as an emotional system a sense of the breadth and depth of knowledge the sciences are contributing to this effort and examples of how this theoretical framework contributes to family research and practice The richness and excitement occurring in the ongoing dialogue between scientists and Bowen family systems practitioners and researchers is captured along with the promise it holds for the study of human behavior

Feldhamer, Lee C. Drickamer, Stephen H. Vessey, Joseph F. Merritt, Carey Krajewski, 2015-01-01 Reflecting the expertise and perspective of five leading mammalogists the fourth edition of Mammalogy Adaptation Diversity Ecology significantly updates taxonomy includes a new chapter on mammalian molecular phylogenetics and highlights several recently described species There are close to 5 500 species in the class Mammalia including the blue whale the largest animal that has ever lived and the pygmy shrew which weighs little more than a penny The functional diversity of mammals has allowed them to play critical roles in every ecosystem whether marine freshwater alpine tundra forest or desert Many mammal species are critically endangered and present complex conservation and management challenges This book touches on those challenges which are often precipitated by overharvesting and habitat loss as well as emerging threats such as the impact of wind turbines and white nose syndrome on bats and chronic wasting disease on deer Among the updates and additions to the fourth edition of Mammalogy are numerous new photos figures and cladograms over 4 200 references as well as A completely new chapter on mammalian phylogeny and genomics Current taxonomy including major changes to orders suborders and superfamilies of bats and rodents An explanation of the recent inclusion of whales with terrestrial even toed ungulates Updates on mammalian structural functional adaptations and fossil history recent advances in our understanding of phylogeny biogeography social behavior and ecology A discussion of two new orders and thirteen newly recognized extant families

Reflections on the implications of climate change for mammals Thorough examinations of several recently described species including Durrell's vontsira *Salanoia durrelli* and the Laotian rock rat *Laonastes aenigmamus* An explanation of mammalian biomechanics such as that seen in lunge feeding of baleen whales Breakout boxes on unique aspects of mammals including the syntax of bat songs singing mice and why there are no green mammals unless we count algae covered sloths Maintaining the accessible readable style for which Feldhamer and his coauthors are well known this new edition of *Mammalogy* is the authoritative textbook on this amazingly diverse class of vertebrates

Medical Insects and Arachnids R.P. Lane, R.W. Crosskey, 2012-12-06 Surprising though it seems the world faces almost as great a threat today from arthropod borne diseases as it did in the heady days of the 1950s when global eradication of such diseases by eliminating their vectors with synthetic insecticides particularly DDT seemed a real possibility Malaria for example still causes tremendous morbidity and mortality throughout the world especially in Africa Knowledge of the biology of insect and arachnid disease vectors is arguably more important now than it has ever been Biological research directed at the development of better methods of control becomes even more important in the light of the partial failure of many control schemes that are based on insecticide although not all is gloom since basic biological studies have contributed enormously to the outstanding success of international control programmes such as the vast Onchocerciasis Control Programme in West Africa It is a *sine qua non* for proper understanding of the epidemiology and successful vector control of any human disease transmitted by an arthropod that all concerned with the problem medical entomologist parasitologist field technician have a good basic understanding of the arthropod's biology Knowledge will be needed not only of its direct relationship to any parasite or pathogen that it transmits but also of its structure its life history and its behaviour in short its natural history Above all it will be necessary to be sure that it is correctly identified
