Leupin, 1991-01-01 The psychoanalyst Jacques Lacan 1901-81 left a legacy of thought that increasingly commands the attention of American scholars and critics His provocative essays and wide ranging seminars and lectures attempted with remarkable success to bridge the supposedly unbridgeable gap between the humanities and modern science For some time his influence has shadowed the theoretical work being done in philosophy psychology anthropology women's studies and literature In *Lacan and the Human Sciences* eight eminent scholars examine how ideas entered these fields how well they were understood and adapted and what fruit they have produced The editor Alexandre Leupin whose introduction reveals the underpinnings of Lacan's thought views the book as a blueprint for overcoming the present impasses of scientific and humanistic discourses and their imaginary contradictions The essays demonstrate the interdisciplinary nature of Lacanian psychoanalysis The relevance of his work to epistemology is considered by Jean Claude Milner Fran ois Regnault and Ellie Ragland Sullivan to anthropology by Jean Joseph Goux to feminist studies by Jane Gallop and to literature by Dennis Porter and Denis Hollier The result is a book that points to a new and more pertinent way of dealing on one hand with the problems of epistemology and on the other with the question of literary theory in the humanities Librarian Arco Publishing
