Alfred J. Andrea Ph.D., 2011-03-23 An unprecedented undertaking by academics reflecting an extraordinary vision of world history, this landmark multivolume encyclopedia focuses on specific themes of human development across cultures era by era, providing the most in-depth expansive presentation available of the development of humanity from a global perspective. Well-known and widely respected historians worked together to create and guide the project in order to offer the most up-to-date visions available. A monumental undertaking. A stunning academic achievement. ABC-CLIO's World History Encyclopedia is the first comprehensive work to take a large-scale thematic look at the human species worldwide. Comprised of 21 volumes covering 9 eras, an introductory volume, and an index, it charts the extraordinary journey of humankind, revealing crucial connections among civilizations in different regions through the ages. Within each era, the encyclopedia highlights pivotal interactions and exchanges among cultures within eight broad thematic categories: population and environment, society and culture, migration and travel, politics and statecraft, economics and trade, conflict and cooperation, thought and religion, science and technology. Aligned to national history standards and packed with images, primary resources, current citations, and extensive teaching and learning support, the World History Encyclopedia gives students, educators, researchers, and interested general readers a means of navigating the broad sweep of history unlike any ever published. Cellular Automata

Georgios Ch. Sirakoulis, Stefania Bandini, 2012-09-20 This book constitutes the refereed proceedings of the 10th International Conference on Cellular Automata for Research and Industry (ACRI 2012) held in Santorini Island, Greece, in September 2012. The 88 revised papers were carefully selected from numerous submissions. In order to give a perspective in which both theoretical and applicational aspects of cellular automata contribute to the growth of the area, this book mirrors the structure of the conference, grouping the 88 papers into two main parts. The first part collects papers presented as part of the main conference and organized according to six main topics: theoretical results on cellular automata, cellular automata dynamics, control and synchronization, cellular automata and networks, modeling and simulation with cellular automata, cellular automata-based hardware and architectures, codes, pseudorandom number generators, and cryptography with cellular automata. The second part of the volume is dedicated to contributions presented during the ACRI 2012 workshops on theoretical advances, specifically asynchronous cellular automata and challenging application contexts for cellular automata.
