Rasmussen, Nigel R M Tai, 2021-08-12 For more than 40 years Rich's Vascular Trauma has been surgeons' 1 reference for the diagnosis and treatment of vascular injury in both civilian and military settings across the globe. Published in association with the Society for Vascular Surgery (SVS), the fully updated 4th Edition reflects recent changes in vascular injury patterns, wounds and trauma care, drawing from current research and a wide variety of peer-reviewed publications to keep you up to date with the latest evidence-based management strategies and techniques. Written and edited by vascular surgeons who are also trauma specialists, civilian and military experts who have proficiency in both open surgical and endovascular techniques, this must-have reference offers a global perspective on every aspect of the broad spectrum of vascular trauma. Covers all vascular surgery procedures required to stop hemorrhage and restore perfusion in vessels in the limbs, junctional areas, torso and neck, including damage control techniques such as shunting and endovascular techniques such as REBOA and stenting. Addresses pre-hospital, emergency department, surgical and endovascular stages of treatment in developed, austere and deployed settings, including a rich section on vascular trauma in multiple international settings that provides important context for the global surgical community. Includes nine new chapters covering prehospital management, endovascular suites, stent grafts, selective aortic arch perfusion, extracorporeal systems and gathering evidence in vascular trauma and more. Presents surgical techniques in step-by-step, highly illustrated detail as well as high-level strategic decision-making such as the logistics of setting up an endovascular trauma service. Includes a new, rapidly digestible Tips and Tricks section summarizing how to execute essential vascular maneuvers and management steps to ensure that patients get the best outcomes. Emphasizes the current management of civilian vascular injuries while drawing upon the best available evidence, experience and lessons learned from Afghanistan, Iraq and the urban battlefield. Contains an innovative chapter on the systems approach and quality improvement in vascular trauma, offering information and tactics for all providers wishing to understand how clinical systems underpin patient outcome and recovery.
