

Why Recycling is important.

By Fabiola Nieto Cervantes.

Have you ever thought about how much garbage you produce every day?

According to Environmental Protection Agency "The average person generates over 4 pounds of trash every day and about 1.5 tons of solid waste each day.

So, just imagine what it means.

As a human, every one of us have been contributing in the pollution of our planet in different ways, but it is not late to do something and help. One easy way to do it could be, recycling.

In my personally experience, I have been recycling plastic bottles and cartons since I was in Elementary School and I am still doing it, because I want to help the place where my family and friends live

One person can do the difference just recycling and take care about the environment.

Hello every one my name is Fabiola Nieto Cervantes and today I will discuss with you about why recycling is important, what some benefits of recycling are, what will happen if we don't do it, and the process to recycle.

Transition: Let's see what the concept is and what some of the benefits are.

MP1: What is recycling?

Recycling is the process of collecting and reprocessing materials that would typically be considered waste.

An example of recycling is reforming old glass bottles into glass building tiles.

Transition: but why should we recycle? What we are going to have if we do it? Let's see our next point.

MP2 Why is recycling important?

Recycling has a lot of benefits that can help people and save the environment as well.
