France, Fin de Siècle Eugen Weber, 1986 The end of the nineteenth century in France was marked by political scandals social unrest dissension and decadence Yet the fin de siècle was also an era of great social and scientific progress a time when advantages previously reserved for the privileged began to be shared by the many Public transportation electrical illumination standard time and an improved water supply radically altered the life of the modest folk

who found time for travel and leisure activities including sports such as cycling Change became the nature of things and people believed that further improvement was not only possible but inevitable In this thoroughly engaging history Eugen Weber describes ways of life not as recorded by general history but as contemporaries experienced them He writes about political atmosphere and public prejudices rather than standard political history Water and washing bicycles and public transportation engage him more than great scientific discoveries He discusses academic painting and poster art the popular stage and music halls at greater length than avant garde and classic theater or opera In this book the importance of telephones plumbing and central heating outranks such traditional subjects as international developments the rise of organized labor and the spread of socialism Weber does not neglect the darker side of the fin de si cle The discrepancy between material advance and spiritual dejection characteristic of our own times interests him as much as the idea of progress and he reminds us that for most people the period was far from elegant In the lurid context of military defeat political instability public scandal and clamorous social criticism one had also to contend with civic dirt unsanitary food mob violence and the seeds of modern day scourges pollution drugs sensationalism debased art the erosion of moral character Yet millions of fin de si cle French lived as only thousands had lived fifty years before while their advance was slow their right to improvement was conceded

The Jedburghs Will Irwin, 2009-04-29 The story of the Special Forces in World War II has never fully been told before Information about them began to be declassified only in the 1980s Known as the Jedburghs these Special Forces were selected from members of the British American and Free French armies to be dropped in teams of three deep behind German lines There in preparation for D Day they carried out what we now know as unconventional warfare supporting the French Resistance in guerrilla attacks supply route disruption and the harassment and obstruction of German reinforcements Always they operated against extraordinary odds They had to be prepared to survive pitched battles

with German troops and Gestapo manhunts for weeks and months while awaiting the arrival of Allied ground forces They were in short heroes The Jedburghs finally tells their story and offers a new perspective on D Day itself Will Irwin has selected seven of the Jedburgh teams and told their stories as gripping personal narratives He has gathered archival documents diaries and correspondence and interviewed Jed veterans and family members in order to present this portrait of their crucial role a role recognized by Churchill and Eisenhower in the struggle to liberate Europe in 1944 45 This is narrative history at its most compelling a vivid drama of the battle for France from deep behind enemy lines
