Politics, Ego & Command Vulnerability Brigadier General James M. Abraham, 2014-12-16 This book is about the mistakes and errors that the author experienced and witnessed in Europe during World War II The author has had feelings of sorrow about the soldiers who died needlessly and the possibility that the war might have ended sooner The book contains both what actually happened and what might have happened It is beyond belief that a fighting Third United States Army under the command of Patton would be stripped of food fuel and supplies to stop him from fighting The book then moves to the post World War II Cold War and how it might have been different had General Patton been allowed to fight An interview with a doctor who came here from Yugoslavia provides details about how life was there The few veterans who were there and still living will recall many of the events in the book The book is written in the memory of the soldiers who died needlessly or were wounded because of the failure of command Also this book is meant to be a lasting tribute to a man who was the true warrior the best general we have ever produced and the general who the Germans feared the most General George S Patton Jr Commander of the Third United States Army

The Problem of Political Foundations in Carl Schmitt and Emmanuel Levinas Gavin Rae, 2016-09-17 In this book Gavin Rae analyses the foundations of political life by undertaking a critical comparative analysis of the political theologies of Carl Schmitt and Emmanuel Levinas In so doing Rae contributes to key debates in contemporary political philosophy specifically those relating to the nature of and the relationship between the theological the political and the ethical as well as those questioning the existence of ahistoric metaphysical ontological and epistemological foundations While the theological is often associated with belief in a fixed foundation such as God or the truth of a religion Rae identifies another sense rooted in epistemology On this understanding the ontological limitations of human cognition mean that ultimately human truth is based in faith and so can never be certain The argument developed suggests that Levinas conception of the political is grounded in theology in the sense of religion particularly the revelations of Judaism For this reason Levinas claims that the political decision is based on how to implement a prior religiously inspired norm justice Schmitt in contrast develops a conception of the political rooted in epistemic faith to claim that the political decision is normless While sympathetic to Schmitt s conception of theology and its relationship to the political Rae concludes by arguing that the emphasis Levinas places on responsibility is crucial to understanding the implications of this The continuing relevance of Schmitt s and Levinas political theologies is that they teach us that while the political decision is ultimately normless we bear an infinite responsibility for the consequences of this normless decision

Realism: Aesthetics, Experiments, Politics Jens Elze, 2022-04-07 Realism seems to be everywhere both as a trending critical term and as a revitalized aesthetic practice This volume brings together for the first time three aspects that are pertinent for a proper understanding of realism its 19th century aesthetics committed to making reality into an object of serious art the experiments with and against realism by 20th century modernist postmodernist or magical realist writing and the politics of realism especially its ambitions to map the complex realities produced by global capitalism and climate catastrophe This juxtaposition of aesthetics experiments and politics unsettles the entrenched opposition between realism and experimental literature that tends to ignore the fact that realism by virtue of its commitment to a changing material and social world cannot be but continuously experimenting The innovative chapters of this book address some of the pressing questions of literary and cultural studies today like the complex relation between historical materialism and new materialisms between science and art or the different aesthetic and political affordances of making systemic analyses against depicting the specificity of the local Some of the chapters deal with classically realist authors such as George Eliot mile Zola and Joseph Conrad to gauge the aesthetic radicalism of their diverse realist projects Others investigate the experimental engagements with realism by authors such as B S Johnson J M Coetzee or Rachel Cusk Yet others analyze the politics of realism found in contemporary anglophone novels by writers like Chimamanda Ngozi Adichie David Mitchell or Rohinton Mistry The readings assembled here are a testament to the diversity of literary realism s from the 19th 20th and 21st centuries and to the ongoing controversies surrounding definitions and deployments of realism
