Burau, Daniel K. Reinstein, 2017-11-03 Neuropsychological and psychological evaluations in school settings are often rich in detail about a child s cognitive academic and emotional functions and come with specific recommendations to support the child s performance in school However there is often a gap between the assessment results and the implementation of the recommendations since learning specialists and teachers frequently do not have the means to both interpret and implement the recommendations This manual presents clear and specific guidelines for school counselors and teachers to decode and put into practice evaluation findings The book begins by describing various functional domains that are assessed in a neuropsychological evaluation and then notes how to recognize behavior and learning styles impacted by difficulty in one of more of the domains Furthermore it outlines activities that could be used in the classroom or other environments to support a child s weaknesses develop new skills or appear to particular strengths Finally ready to use worksheets and activities are offered This is an essential tool for school psychologists special education teachers and learning specialists and counselors **Project-Based Learning Applied to the Language Classroom** Juliana Franco Tavares/ Louise Emma Potter, 2018-03-05 In *Project Based Learning Applied to the Language Classroom* the authors propose a way to develop PBL in the language classrooms taking into account all of the obstacles and specifics involved in teaching a foreign language It is about teaching English as a second or foreign language using Project Based Learning PBL We approach this combination because many people seem to think about implementing PBL in their language classes and ask questions about how to do it but feel that there aren t enough materials based on this methodology In fact most researchers and writers we have come across discuss the applications of PBL in the students mother tongue to subjects such as Math History Literature Social Studies and Science However there are few published works about the specifics of PBL in foreign language classes Besides it seems obvious to us that the main difficulty in developing projects in a second or foreign language lies exactly on the fact that communication may be hindered when students do not have enough knowledge in the target language *Courageous Conversations in the Classroom* , *Reading and Writing Activities on the Go* Julie Adams, 2003 Over 80 activities covering all the key learning areas are included This book contains motivating themes
