Real Rider Never Die:

Legends Never Die Richard Ian Kimball, 2017-04-28 With every touchdown home run and three pointer star athletes represent an American dream that only an elite group blessed with natural talent can achieve However Kimball concentrates on what happens once these modern warriors meet their untimely demise As athletes die legends rise in their place The premature deaths of celebrated players not only capture and immortalize their physical superiority but also jolt their fans with an unanticipated intensity These athletes escape the inevitability of aging and decline of skill with only the prime of their youth left to be remembered But early mortality alone does not transform athletes into immortals The living ultimately gain the power to construct the legacies of their fallen heroes In Legends Never Die Kimball explores the public myths and representations that surround a wide range of athletes from Lou Gehrig and Joe DiMaggio to Dale Earnhardt and Bonnie McCarroll Kimball delves deeper than just the cultural significance of sports and its players he examines how each athlete's narrative is shaped by gender relations religion and politics in contemporary America In looking at how Americans react to the tragic deaths of sports heroes Kimball illuminates the important role sports play in US society and helps to explain why star athletes possess such cultural power

Time And Beauty: Why Time Flies And Beauty Never Dies Adrian Bejan, 2022-02-15 Time and beauty are two of our most visceral perceptions Yet their nature is seldom questioned In this ground breaking new work

Adrian Bejan a true original among physicists explains in a scholarly yet colorful style the scientific basis for the perception of time and beauty Organized into three main ideas the book begins first with the perception of time The author expounds on why we feel that time flies faster as we get older Perceived time also called mind time is different from clock time In this context time is another word for perceived change Next readers will discover that beauty is appealing because beautifully shaped images are scanned faster by two eyes To observe our immediate surroundings and to understand them faster is highly advantageous to survival hence there is an underlying evolutionary advantage to our discernment for ideal ratios shapes and beauty at large Finally time and beauty are jointly understood to explain why the global pandemic had decelerated our mind time This understanding arms us with techniques to slow down our mind time which accelerates with age and to create the conditions for living longer and more creatively Scientists may have contemplated aspects of time and beauty separately In contrast the author submits an original and rewarding approach to understanding them together In the process key questions to our cognition are answered Why does the mind try to make sense of a new mental image Why is there a natural tendency to organize a new input and mentally position it among past perceptions Through physics the book offers a general answer to empower the individual with speed and clarity of thought understanding decision making and movement The same answer holds for the other disparate perceptions illustrated in this book from time and beauty to ideas message shape perspective art science illusions and dreams
