Knowledge and Knowing in Media and Film Studies Steve Connolly, 2025-05-20 For traditional subjects such as History Art and Science debate about the nature of knowledge in the school curriculum has produced a growing literature on the relationship between disciplinary knowledge and what is taught in schools For newer subjects however the path is less clear Knowledge and Knowing in Media and Film Studies is the first book to grapple with the question for these two related subjects Steve Connolly argues that while Media and Film Studies each have a clear epistemological base consideration of craft skills alongside factual knowledge and criticality has led to the development of different criteria for what constitutes valuable knowledge than in traditional school subjects The book problematises this difference through a genealogy of both subjects as they appear in the English school curriculum charting their historical and disciplinary origins within that system In so doing it finds that far from being new subjects Media and Film Studies have parallel histories with more established subjects Using a range of primary and secondary data including interviews with media and film teachers case studies and historical sources the book provides an account of knowledge and knowing in school Media Studies and Film Studies which both consolidates existing views and proposes some new perspectives Praise for Knowledge and Knowing in Media and Film Studies The status of Media and Film Education has been contested for a very long time In this book Steve Connolly drills down beneath the surface level of debates about academic rigour and what education is for He analyses how knowledge works in these subjects how it differs from other educational processes why this is important and how this matters for more recent endeavours in media literacy No future conversation about the value of these subjects in education should begin without attention to this rich contribution Julian McDougall Bournemouth University **The Times Index**, 2007 Indexes the Times and its supplements *Know it All, Find it Fast for Youth Librarians and Teachers* Christine Donnelly, 2012 A brand new version of the best selling enquiry desk reference text Know it All Find it Fast specifically designed for those working with children and young people in schools public libraries and at home Including an invaluable overview of the education system and the school curriculum as well as a comprehensive listing of useful resources by topic this A Z covers school subjects from science and maths to reading and literacy and more general themes such as children s health wellbeing and hobbies Each topic is broken down into useful sections that will help to guide your response Typical questions outline common queries such as Have you got any information about volcanoes Considerations provides useful hints and tips i e Geography now encompasses not only physical and human geography but also environmental geography social geography geology and geopolitics Where to look lists relevant printed digital and online resources with useful annotations explaining their scope and strengths Readership This is the must have quick reference tool arming librarians and teachers with the
