Oeuvres De Jean Le Rond D'Alembert:

Euvres de d'Alembert Nicolas de Condorcet, Ligarán, 2016-08-30 Extrait D'Alembert n'a rien dans sa figure de remarquable soit en bien soit en mal On prétend car il ne peut en juger lui-même que sa physionomie est pour l'ordinaire ironique et maligne la vérité il est très frappé du ridicule et peut-être a-t-il quelque talent pour le saisir Ainsi il ne serait pas tonnant que l'impression qu'il en reçoit se peigne souvent sur son visage Sa conversation est très singulière tantôt sérieuse tantôt gaie

PROPOS DES ÉDITIONS LIGARAN Les éditions LIGARAN proposent des versions numériques de grands classiques de la littérature ainsi que des livres rares dans les domaines suivants Fiction roman poésie théâtre jeunesse policier libertin Non fiction histoire essais biographies pratiques

The Cambridge History of Eighteenth-century Philosophy Knud Haakonssen, 2006 This two volume set presents a comprehensive and up to date history of eighteenth century philosophy The subject is treated systematically by topic not by individual thinker school or movement thus enabling a much more historically nuanced picture of the period to be painted

Styles of Enlightenment Elena Russo, 2007-01-19 Styles of Enlightenment argues that alongside its democratic ideals and its efforts to create a unified public sphere the Enlightenment also displayed a tendency to erect rigid barriers when it came to matters of style and artistic expression The French philosophes tackled the issue of the hierarchy of genres with surprising inflexibility and they looked down on those forms of art that they saw as commercial popular and merely entertaining They were convinced that the standard of taste was too important a matter to be left to the whims of the public and the vagaries of the marketplace aesthetic judgment ought to belong to a few enlightened minds who would then pass it on to the masses Through readings of fictions essays memoirs eulogies and theatrical works by Fénelon Bouhours Marivaux Montesquieu Voltaire Diderot Rousseau Mercier Thomas and others Styles of Enlightenment traces the stages of a confrontation between the virile philosophe and the effeminate worldly writer good and bad taste high art and frivolous entertainment state patronage and the privately sponsored marketplace the academic eulogy and worldly conversation It teases out the finer points of division on the public battlefields of literature and politics and the new world of contesting sexual economies

History of Mathematics and Its Contexts Andrea Verdugo Rohrer, Joerg Zender, 2024-11-01 This book celebrates Gert Schubring's 80th birthday and honors his impactful contributions to the field of history of mathematics and its education Recognized with the prestigious Hans Freudenthal Award in 2019 Schubring's academic work sets the tone for this volume The thoughtfully curated articles in this collection offer insightful studies on textbooks and biographies of key figures in mathematics and mathematics education contextualizing their significance within the broader historical landscape and providing the readers with a deeper understanding of the development of the history of mathematics and its education Researchers as well as curious readers and students will find this collection to be a valuable resource in the field

The Discourse of Sensibility Henry Martyn Lloyd, 2013-12-12 This volume reconstructs the body of sensibility and the discourse which constructed it The discourse of sensibility was deployed

very widely throughout the mid to late eighteenth century particularly in France and Britain To inquire into the body of sensibility is then necessarily to enter into an interdisciplinary space and so to invite the plurality of methodological approaches which this collection exemplifies The chapters collected here draw together the histories of literature and aesthetics metaphysics and epistemology moral theory medicine and cultural history Together they contribute to four major themes First the collection reconstructs various modes by which the sympathetic subject was construed or scripted including through the theatre poetry literature and medical and philosophical treatises It secondly draws out those techniques of affective pedagogy which were implied by the medicalisation of the knowing body and thirdly highlights the manner in which the body of sensibility was constructed as simultaneously particular and universal Finally it illustrates the centrifugal forces at play within the discourse and the anxiety which often accompanied them At the centre of eighteenth century thought was a very particular object the body of sensibility the Enlightenment's knowing body The persona of the knowledge seeker was constructed by drawing together mind and matter thought and feeling And so where the Enlightenment thinker is generally associated with reason truth telling and social and political reform the Enlightenment is also known for its valorisation of emotion During the period intellectual pursuits were envisioned as having a distinctly embodied and emotional aspect The body of sensibility encompassed these apparently disparate strands and was associated with terms including sentimental sentiment sense sensation and sympathy

The Specter of Skepticism in the Age of Enlightenment Anton M. Matytsin, 2016-10-26 Enlightenment confidence in the power of human reason was earned by grappling with the challenge of philosophical skepticism The ancient Greek philosophy of Pyrrhonian skepticism spread across a wide spectrum of disciplines in the 1600s casting a shadow over the European learned world The early modern skeptics expressed doubt concerning the existence of an objective reality independent of human perception They also questioned long standing philosophical assumptions and at times undermined the foundations of political moral and religious authorities How did eighteenth century scholars overcome this skeptical crisis of confidence to usher in the so called Age of Reason In *The Specter of Skepticism in the Age of Enlightenment* Anton Matytsin describes how skeptical rhetoric forced philosophers to formulate the principles and assumptions that they found to be certain or at the very least highly probable In attempting to answer the deep challenge of philosophical skepticism these thinkers explicitly articulated the rules for attaining true and certain knowledge and defined the boundaries beyond which human understanding could not venture Matytsin explains the dialectical outcome of the philosophical disputes between the skeptics and their various opponents in France the Dutch Republic Switzerland and Prussia He shows that these exchanges transformed skepticism by mitigating its arguments while broadening the learned world's confidence in the capacities of reason by moderating its aspirations Ultimately the debates about the powers and limits of human understanding led to the making of a new conception of rationality that privileged practicable reason over speculative reason Matytsin also complicates common narratives about the Enlightenment by demonstrating that most of the

thinkers who defended reason from skeptical critiques were religiously devout By attempting either to preserve or to reconstruct the foundations of their worldviews and systems of thought they became important agents of intellectual change and formulated new criteria of doubt and certainty This complex and engaging book offers a powerful new explanation of how Enlightenment thinkers came to understand the purposes and the boundaries of rational inquiry *Feeding France* E. C. Spary, 2014-05-22 *Feeding France* is the first comprehensive study of the French food industry in the decades surrounding the French Revolution of 1789 Though the history of gastronomy and the restaurant have been explored by scholars few are aware that France was also one of the first nations to produce industrial foods In this time of political and social upheaval chemists managed to succeed both as public food experts and as industrial food manufacturers This book explores the intersection between knowledge practice and commerce which made this new food expertise possible and the institutional and experimental culture which housed it Ranging from the exigencies of Old Regime bread making to the industrial showcasing of gelatine manufacture E C Spary rewrites the history of the French relationship with food to show that industrialisation and patrimonialism were intimately intertwined *A Cultural History of Ideas in the Age of Enlightenment* Jack R. essay that recounts the great man's life and reflects on his outsized influence on Western culture. Whether you are a Voltaire scholar or a neophyte, *The Quotable Voltaire* is the perfect introduction to a brilliant mind. — *Analyse et dynamique* Michel Paty, 2002. Etudie un domaine majeur de l'oeuvre scientifique de l'encyclopediste Jean Le Rond D'Alembert, la dynamique. Montre les divers aspects de sa theorie, les rapports avec l'analyse, sa place centrale dans l'edifice encyclopedique et la philosophie des Lumieres. — Let There Be Enlightenment Anton M. Matytsin, Dan Edelstein, 2018-09-14. Challenging the triumphalist narrative of Enlightenment secularism. According to most scholars, the Enlightenment was a rational awakening, a radical break from a past dominated by religion and superstition. But in *Let There Be Enlightenment*, Anton M. Matytsin, Dan Edelstein, and the contributors they have assembled deftly undermine this simplistic narrative. Emphasizing the ways in which religious beliefs and motivations shaped philosophical perspectives, essays in this book highlight figures and topics often overlooked in standard genealogies of the Enlightenment. The volume underscores the prominent role that religious discourses continued to play in major aspects of seventeenth and eighteenth century thought. The essays probe a wide range of subjects: from reformer Jan Amos Comenius's quest for universal enlightenment to the changing meanings of the light metaphor; Quaker influences on Baruch Spinoza's theology and the unexpected persistence of Aristotle in the Enlightenment; exploring the emergence of historical consciousness among Enlightenment thinkers while examining their repeated insistence on living in an enlightened age. The collection also investigates the origins and the long-term dynamics of the relationship between faith and reason. Providing an overview of the rich spectrum of eighteenth century culture, the authors demonstrate that religion was central to Enlightenment thought. The term enlightenment itself had a deeply religious connotation. Rather than revisiting the celebrated breaks between the eighteenth century and the period that preceded it, *Let There Be Enlightenment* reveals the unacknowledged continuities that connect the Enlightenment to its various antecedents. Contributors: Philippe Buc, William J. Bulman, Jeffrey D. Burson, Charly Coleman, Dan Edelstein, Matthew T. Gaetano, Howard Hotson, Anton M. Matytsin, Darrin M. McMahon, James Schmidt, Celine Spector, Jo Van Cauter. — *Peculiar Attunements* Roger Mathew Grant, 2020-03-03. *Peculiar Attunements* places the recent turn to affect into conversation with a parallel movement in European music theory of the eighteenth century. During that time, the affects or passions, as they were also called, formed a vital component of a mimetic model of the arts. Eighteenth century critics held that artworks imitated or copied the natural world in order to produce copies of the affects in their beholders. But music caused a problem for such theories since it wasn't apparent that musical tones could imitate anything with any dependability beyond the rare thunderclap or birdcall. Struggling to articulate how it was that music managed to move its auditors without imitation, certain theorists developed a new affect theory, crafted especially for music, postulating that music's physical materiality, as sound vibrated the nerves of listeners and attuned them to the affects through sympathetic resonance. This was a theory of affective attunement that bypassed the entire structure of representation, offering a non-discursive corporeal alternative. It is a pendant to

contemporary theories of affect and one from which they have much to learn Inflecting our current intellectual moment through eighteenth century music theory and aesthetics this book offers a reassessment of affect theory's common systems and processes It offers a new way of thinking through affect dialectically drawing attention to patterns and problems in affect theory that we have been given to repeating Finally taking a cue from eighteenth century theory it gives renewed attention to the objects that generate affects in subjects Voluptuous Philosophy Natania Meeker, 2006 In 18th century France matter itself in forms ranging from atoms to anatomies became a privileged object of study This book defines what is at stake in the emergence of an enlightened secular materialism by showing how questions of figure are consistently located at the very heart of 18th century debates on the nature of material substance The Enlightenment and the Intellectual Foundations of Modern Culture Louis K. Dupré, 2004-01-01 Studie over de Verlichting *Human and Animal Cognition in Early Modern Philosophy and Medicine* Stefanie Buchenau, Roberto Lo Presti, 2018-10-26 From the sixteenth to the eighteenth century new anatomical investigations of the brain and the nervous system together with a renewed interest in comparative anatomy allowed doctors and philosophers to ground their theories on sense perception the emergence of human intelligence and the soul body relationship in modern science They investigated the anatomical structures and the physiological processes underlying the rise differentiation and articulation of human cognitive activities and looked for the anatomical roots of the specificity of human intelligence when compared to other forms of animal sensibility This edited volume focuses on medical and philosophical debates on human intelligence and animal perception in the early modern age providing fresh insights into the influence of medical discourse on the rise of modern philosophical anthropology Contributions from distinguished historians of philosophy and medicine focus on sixteenth century zoological psychological and embryological discourses on man the impact of mechanism and comparative anatomy on philosophical conceptions of body and soul and the key status of sensibility in the medical and philosophical enlightenment
