Language Learning Motivation Rebecca L. Oxford,1996 This volume chronicles a revolution in our thinking about what makes students want to learn languages and what causes them to persist in that difficult and rewarding adventure Topics in this book include the internal structures of and external connections with foreign language motivation exploring adult language learning motivation self efficacy and anxiety comparing the motivation and learning strategies of students of Japanese and Spanish and enhancing the theory of language learning motivation from many psychological and social perspectives

**Science Education as a Pathway to Teaching Language Literacy** ,2010-01-01 In this era of mandated high stakes and standardized testing teachers and schools officials find themselves struggling to meet the demands for improved student achievement At the same time they are also expected to teach all subjects as required by national and state curriculum standards Because of these competing demands science is not even taught or taught less often in order to make more room for mathematics and language arts drill and practice and teaching to the test Anyone concerned with providing students with a well rounded education should ask whether these drastic measures even if they were to show improvement in achievement justify denying children access to the unique opportunities for intellectual growth and social awareness that the effective instruction of science provides Will these students have enough exposure to the science curriculum to prepare them to do well later in middle and high school How is this current situation going to help ameliorate the pervasive achievement gap in science and how is it going to motivate students to pursue science related careers The authors of this book believe that instead of sacrificing the science curriculum to make more time for drill and practice in mathematics and language arts what should be done is to connect current research on literacy and science instruction with effective pedagogy Therefore this volume provides fresh theoretical insights and practical applications for better understanding how science can be used as a pathway to teaching literacy and hence as a pathway to improving teachers practice and students learning

**The Politics of English Language Education and Social Inequality** Maya Kalyanpur, Padmini Bhuyan Boruah, Sarina Chugani Molina, Sunaina Shenoy, 2022-12-30 Based on policy analysis and empirical data this book examines the problematic consequences of colonial legacies of language policies and English language education in the multilingual contexts of the Global South Using a postcolonial lens the volume explores the raciolinguistics of language hierarchies that results in students from low income backgrounds losing their mother tongues without acquiring academic fluency in English Using findings from five major research projects the book analyzes the specific context of India where ambiguous language policies have led to uneasy tensions between the colonial language of English national and state languages and students linguistic diversity is mistaken for cognitive deficits when English is the medium of instruction in schools The authors situate their own professional and personal experiences in their efforts at dismantling postcolonial structures through reflective practice as teacher educators and present solutions of decolonial resistance to linguistic hierarchies that include critical pedagogical alternatives to bilingual education and opportunities for increased teacher agency Ultimately this timely volume will appeal to researchers scholars academics and students in the fields of international and comparative education English and literacy studies and language arts more broadly Those interested in English language learning in low income countries specifically will also find this book to be of benefit to their research
