Bullying in Schools

What seems fun and harmless for some students, is painful and degrading to others. Bullying has been a critical issue around schools, but before it was not as dangerous and know as it is now. These do not means bullying was not happening, it means it was not taken into consideration by parents or teachers. They thought it was just peer pressure or a kids game, and sooner or later the kids would be friends again. At one point, bullies think it's normal to be mean and abusive to other students. They tell the victim, "I'm just messing with you" after aggression. On the other hand, the victim gives power to the bully by not speaking up and being afraid. Bullying can be avoid if the victim speaks up and seeks help from a teacher, parent, the principal, or a friend

By knowing the cause and effect of bullying, students can identify it and immediately report it. Students are sometimes afraid to report incidents of bullying, because they are afraid of consequences like dislike and increased conflict with the bully. To prevent this fear, students should be encouraged to speak to an adult without any hesitation

Bullying Can Be Prevented Bullying is a form of violence to pick on victims because they are different from their bullies, have insecurity/jealousy or home problems. The hate towards their victim has something to do with the victim having an unusual gift or being intelligent the bullies has yet to become. It is important that this behavior should be prevented or it will become worse. Bullying is one of the main issues public and private schools have to face on a day-to-day basis. When the bully takes it too far, the victim snaps and retaliates by fighting him/her back physically or verbally.

Create Your School Library Writing Center Timothy Horan,2016-10-16 Colleges typically have writing centers to which

students can bring their writing assignments to a peer tutor for assistance but most high schools and middle schools do not. This book advocates for the creation of writing centers in K-12 schools and explains why the school library is the best place for the writing center. There is a glaring absence of writing centers in today's K-12 schools. More and more students are being asked in college entrance testing to submit samples of their writing and employers are expecting their workers to write correctly and clearly. This book addresses the critical lack of writing centers below the undergraduate level. It demonstrates how middle school and high school librarians can create writing centers in their school libraries, explains how to assist students through a one-on-one writing tutorial method, and gives students and teachers the tools for learning and understanding the complex art of writing. Author Timothy Horan, inventor of the School Library Writing Center, establishes why school libraries represent the best and most logical places to create writing centers and why school librarians are the natural choice to direct writing center operations. He then takes readers through the process of creating a writing center from original conception up through opening day. Additional topics covered include how to publicize and grow your School Library Writing Center, maintaining your writing center for efficient operation on a daily basis as well as for years to come, how to become an effective writing center director and writing tutor, the most current technology that can be used to assist in the writing composition and research process, and working with English language learner (ELL) students within your writing center.

[The Crisis of School Violence](#) Marianna

King, 2020-12-01 The Crisis of School Violence is the only interdisciplinary book about school violence. It presents a broad and in-depth approach to the key questions about why bullying continues at an unprecedentedly high rate and why rampage school shootings continue to shock the nation. Based on extensive research, The Crisis of School Violence investigates human nature and its relation to aggressive behavior, with a special focus on the culture of violence that predates school violence, including rampage shootings and perpetuates industries that profit from violence. Marianna King presents the considerable psychological and neuroscientific research that investigates the effects of violent entertainment media on the brain and subsequently on behavior, which clearly reveals a causal connection between exposure to violent electronic entertainment media, especially violent video games, and increased aggressive and violent behavior. The book also reveals a more specific connection between exposure to violent video games and rampage school shootings. Ultimately, this volume is a call to action that includes recommendations for parents, teachers, decision makers, and citizens alike.
