Leppien, Jeanne H. Purcell, 2011-02-15

Based on the best-selling book *The Parallel Curriculum*, this resource deepens teachers' understanding of how to use the Parallel Curriculum Model (PCM) to provide rigorous learning opportunities for students in science grades 6-12. This collection of sample units and lessons within each unit were developed by experienced teachers and demonstrate what high-quality curriculum looks like within a PCM framework. Ideal for use with high-ability students, the units revolve around genetics, the convergence of science and society, the integration of English and Biology, and the Periodic Table. Lessons include pre and post assessments. *Four Square: Writing Method Grades 4-6* Judy Gould, Evan Jay Gould, Mary F. Burke, 2010-09-01

Teach writing skills using the Four Square method, which has been proven to work in classrooms just like yours. This revised and updated edition of the book also includes PowerPoint files filled with additional Four Square examples, activities, and writing exercises. The Four Square method can be used with all forms of writing and will fit any reading or language arts program. This step-by-step approach is built around a simple graphic organizer that first shows students how to collect ideas and then helps them use those ideas to create clear and polished prose. Open-ended reproducibles make the technique accessible to writers of all ability ranges. It is also great for content-area writing. **Teaching Dilemmas and**

Solutions in Content-Area Literacy, Grades 6-12 Peter Smagorinsky, 2014-08-19 Because literacy is not just the English teacher's job, think literacy is just for English teachers. Not anymore. Nor should it be when you consider that each discipline has its own unique values and means of expression. These days it's up to all teachers to communicate what it means to be literate in their disciplines. Here finally is a book ambitious enough to tackle the topic across all major subject areas. Engage in this cross-disciplinary conversation with seasoned teachers and university researchers and learn how to develop curriculum and instruction that are responsive to students' needs across English, language arts, science, social studies, mathematics, visual space, and music and drama. Peter Smagorinsky and his colleagues provide an insider's lens on both the states of their fields and their specific literacy demands, including reviews of current issues and state-of-the-art research informing literacy education. Scenario-based activities for reflection and discussion typify the dilemmas and challenges faced by practicing teachers. Considerations of the textual forms and conventions required in each discipline. Specific policy recommendations. Read this book on your own for immediate suggestions on how to improve literacy instruction within your

course of study Better yet share it with colleagues and participate in a larger conversation about how your literacy expectations influence the ways students read and produce texts in other disciplines *Models for Uncertainty in Educational Testing* Nicholas T. Longford, 2012-12-06 A theme running through this book is that of making inference about sources of variation or uncertainty and the author shows how information about these sources can be used for improved estimation of certain elementary quantities Amongst the topics covered are essay rating summarizing item level properties equating of tests small area estimation and incomplete longitudinal studies Throughout examples are given using real data sets which exemplify these applications
