

Persuasive Essay on High Schools

Imagine that you are a high school student. Everyday, you eat lunch with your friends at the fast food place near your school. You order your usual double cheeseburger with French fries and go to sit down with your friends. They're standing by the wall, waiting for another group to get up so you can sit at your usual table by the vending machine. Ten minutes go by before the group finally leaves. When you sit down and look at your cell phone, you realize that you have only three minutes to get to class! You scarf down your double cheeseburger and manage to squeeze in a few French fries before you hastily start for the door.

You try to put on your fleece, it's a rather blustery day, but it won't zipper up all the way and fits you much more snugly than it used to. Now you have a mere two minutes to cross the street and race up the stairs through the throng of students. When you finally get to class, the late bell has already rung and you're out of breath. Your teacher decides that taking 5 off your essay due today is reasonable punishment, not that he believes you will ever get an A anyways. I am writing this essay to express my opinion on closing down the fast food restaurant that recently opened across from my school. My opinion is it should be shut down. I believe the way I do because students return late from lunch, fast food is extremely unhealthy, and not all students can fit in at once.

 Rebecca Lowenhaupt, Katherine L. McNeill, Rebecca Katsh-Singer, Ben Lowell, Kevin Cherbow, 2021-10-25 An accessible
 engaging primer on the eight science practices at the heart of the Next Generation Science Standards NGSS providing K-8
 instructional leaders with the grounding they need to ensure excellent science instruction in every classroom The NGSS
 reconceptualize science instruction by redefining the teacher as someone who helps students construct their own knowledge
 by thinking like scientists and engaging in discrete science practices However with STEM teachers in short supply and
 generalists often feeling underprepared to teach elementary and middle school science what can instructional leaders do to
 ensure students get a strong start in this critical area and learn to love science Although a content neutral approach to
 supervision one that emphasizes general pedagogical features such as student engagement cognitive load or classroom
 management is undoubtedly beneficial the best instructional leaders know that content specific approaches are necessary to
 achieve real excellence We therefore need to go deeper if we want to engage both teachers and students with the science
 practices We need science specific supervision With that in mind the authors provide vignettes and examples of the science
 practices in use advice on observing science classrooms concrete look fors and guidance on fostering ongoing teacher
 learning They also offer a rich compendium of research and evidence based resources including sample lessons FAQs and
 more than a dozen downloadable tools to facilitate classroom observation feedback sessions and professional development
 This is an essential guide for any K-8 instructional leader who wants to empower all teachers to provide all students with rich
 science experiences and develop the cognitive and noncognitive skills students will need to thrive in more advanced courses
 work and society
