communicating insights This book advances an in depth exploration of relations between physics and literature from both perspectives It turns around the tendency to discuss relations between literature and science in one sided and polarizing ways The collection is the result of the inaugural conference of ELINAS the Erlangen Center for Literature and Natural Science an initiative dedicated to building bridges between literary and scientific research ELINAS revitalizes discussion of science literature interconnections with new topics ideas and angles by organizing genuine dialogue among participants across disciplinary lines The essays explore how scientific thought and practices are conditioned by narrative and genre fiction models and metaphors and how science in turn feeds into the meaning making of literary and philosophical texts

The Oxford Handbook of the European Iron Age Colin Haselgrove, Katharina Rebay-Salisbury, Peter S. Wells, 2023 The Oxford

Handbook of the European Iron Age presents to students scholars and interested general readers a broad overview of current understanding of the archaeology of Europe from 1000 BC through to the early historic periods **How Ancient**

Europeans Saw the World Peter S. Wells, 2012-08-26 A revolutionary approach to how we view Europe's prehistoric culture The peoples who inhabited Europe during the two millennia before the Roman conquests had established urban centers large scale production of goods such as pottery and iron tools a money economy and elaborate rituals and ceremonies Yet as Peter Wells argues here the visual world of these late prehistoric communities was profoundly different from those of ancient Rome's literate civilization and today's industrialized societies Drawing on startling new research in neuroscience and cognitive psychology Wells reconstructs how the peoples of pre Roman Europe saw the world and their place in it He sheds new light

on how they communicated their thoughts feelings and visual perceptions through the everyday tools they shaped the pottery and metal ornaments they decorated and the arrangements of objects they made in their ritual places and how these forms and patterns in turn shaped their experience How Ancient Europeans Saw the World offers a completely new approach to the study of Bronze Age and Iron Age Europe and represents a major challenge to existing views about prehistoric cultures The book demonstrates why we cannot interpret the structures that Europe s pre Roman inhabitants built in the landscape the ways they arranged their settlements and burial sites or the complex patterning of their art on the basis of what these things look like to us Rather we must view these objects and visual patterns as they were meant to be seen by the ancient peoples who fashioned them *Structures and Architecture.
