

Real-World Biology: Analysis, Extending Our Senses continued

Part B: Using Microscopes to Examine Evidence

The Student Council room at Central High has been set up for a crime scene investigation. Three weeks ago, Mrs. Sarah Roberts, the biology teacher, was writing a test in the lab. Her lunch was on the table where she was working. Suddenly, the fire alarm rang. Mrs. Roberts promptly left the building and, in her haste, left the lab door open. She was surprised to see a large group of people outside the building, most of them with animals. She thought this was a little unusual but soon forgot about it. When Mrs. Roberts returned to the lab, she found that her lunch was missing.

Background Information

Red blood cells of mammals do not have nuclei.

Red blood cells of nonmammals have nuclei.

Cancer cells lack contact inhibition. They continue to grow, forming layers of cells. The cells grow randomly in culture.

Normal skin cells grow in culture until they physically come in contact with each other. Growth then stops. This is called contact inhibition. The cells do not grow randomly, but are oriented in a particular direction.

Laboratory Test Results

Debris from the floor: sand and hay

Blood sample: Red blood cells have nuclei.

Skin sample: Was cultured; cells were found to have contact inhibition and be oriented in a particular direction.

She looked around the room and saw some things that had not been there when she left. There was some kind of debris on the floor. A small piece of human skin was stuck to a broken beaker. Nearby was a trail of blood. The security chief arrived, collected the three pieces of evidence, and ordered laboratory reports on each. The laboratory used microscopes to examine the skin and blood samples. The security chief then apprehended four suspects. All were in the vicinity of the building on the day of the theft. The following information is listed on the evidence bulletin board. You must use this information to determine who stole the lunch bag.

Suspects

Suspect 1

- Spends weekends on the beach
- Works as a dishwasher
- Is being treated for skin cancer
- Has a poodle named Fifi with a bandaged leg

Suspect 2
