Rearming For The Cold War 1945 1960:

Rearming for the Cold War, 1945-1960 Elliott Vanveltner Converse, 2012 Book Description The first publication in a multivolume series on the history of the acquisition of major weapon systems by the Department of Defense author Elliott Converse presents a meticulously researched overview of changes in acquisition policies organizations and processes within the United States military establishment during the decade and a half following World War II Many of the changes that shaped the nature and course of weapons research and development production and contracting through the end of the century were instituted between 1945 and 1960 many of the problems that have repeatedly challenged defense policymakers and acquisition professionals also first surfaced during these years This study is the first to combine the histories of the Office of the Secretary of Defense OSD and the military services into one account The volume is organized chronologically with individual chapters addressing the roles of OSD the Army Navy and Air Force in two distinct periods [Rearming for the Cold War 1945-1960](#) Office of the Secretary of Defense, 2014-10-23 World War II was one of history's watersheds an event of such great consequence that it destroyed or dramatically altered political economic and social structures and patterns in place when the conflict began setting most of the earth's nations and peoples on new courses Worldwide for example the war hastened the end of Western colonialism At its founding in 1945 the United Nations comprised 51 nations By 1961 membership had more than doubled to 104 nations two thirds of the new arrivals were former colonies of the European states 1 In the United States the war was the catalyst for far reaching economic and social changes including the industrialization of the South and the West and equality for women and blacks But most immediate and significant was that it revolutionized the nation's role in international affairs Following the war the United States turned away from its traditional isolationism and took up leadership of the world's democracies To fulfill this responsibility and to preserve the nation's security American leaders felt compelled to maintain powerful military forces This conviction coupled with the decision to anchor military strength in advanced weapons technologies meant that the acquisition of materiel a function that had also been transformed by the war would assume unprecedented importance even in peacetime Until 1945 except in wars the United States had followed an isolationist foreign policy This did not mean that the nation cut itself off from the world Americans had traded continuously with other nations since colonial times Rather the United States shied away from making formal peacetime political and military commitments with other nations particularly in Europe Thus after World War I the Senate refused to ratify the Treaty of Versailles strongly supported by President Woodrow Wilson that would have made the United States a member of the League of Nations **Rearming for the Cold War, 1945-1960** Elliott Vanveltner Converse, 2011 [Rearming for the Cold War, 1945-1960](#) Converse Elliott V., 2012 [Rearming for the Cold War 1945-1960 - History of Acquisition in the Department of Defense of Nuclear Weapons, Missiles and Rockets, the Nuclear Navy, Air Force Bombers, and the Atomic Army](#) Department of Defense, U. This volume is a history of the acquisition of major weapon systems by the United States armed forces from 1945 to 1960 the decade and a half that spanned the Truman and Eisenhower administrations following World War II These instruments of warfare aircraft armored vehicles artillery guided missiles naval vessels and supporting electronic systems when combined with nuclear warheads gave the postwar American military unprecedented deterrent and striking power They were also enormously expensive A Brookings Institution study estimated that from the end of World War II through the mid 1990s the United States spent over 5 trillion including the cost of the wartime atomic bomb project on the development production and deployment of nuclear weapons and on the systems for delivering and defending against them Twenty percent of that sum was expended between 1945 and 1960 Although there is a large body of published literature on specific aspects of weapons acquisition primarily studies of individual systems no in depth analysis has yet appeared that combines the histories of the Office of the Secretary of Defense OSD and the military services into one account Such a study is badly needed World War II was a watershed for acquisition The postwar defense environment was dramatically different from that existing before the war So too were the policies organizations and processes that governed the acquisition of new weapons Many of the changes that shaped the nature and course of acquisition through the end of the century were instituted between 1945 and 1960 Additionally many of the problems that have repeatedly challenged defense policymakers and acquisition professionals since World War II first surfaced during those years History does not repeat itself exactly but by revealing long term trends and the reasons for past choices it can help illuminate the path forward for those who must grapple with the complex issues surrounding the development production and deployment of major weapon systems The volume is organized chronologically with individual chapters addressing the roles of OSD the Army Navy and Air Force in two distinct periods The first roughly coinciding with President Truman s tenure covers the years from the end of World War II through the end of the Korean War in 1953 The second spans the two terms of the Eisenhower presidency from 1953 through early 1961 The year 1953 marked a natural breakpoint between the two periods The Korean War had ended President Eisenhower and his defense team began implementing the New Look a policy and strategy based on nuclear weapons which they believed would provide security and make it possible to reduce military spending The New Look s stress on nuclear weapons along with the deployment of the first operational guided missiles and the rapid advances subsequently made in nuclear and missile technology profoundly influenced acquisition in the services throughout the 1950s and the remainder of the century

,2012* **History of Acquisition in the Department of Defense, Volume 1** Elliott V. Converse,2012-06-12 This volume is a history of the acquisition of major weapon systems by the United States armed forces from 1945 to 1960 the decade and a half that spanned the Truman and Eisenhower administrations following World War II These instruments of warfare aircraft armored vehicles artillery guided missiles naval vessels and supporting electronic systems when combined with nuclear warheads gave the postwar American military unprecedented deterrent and striking power 1 They were also enormously expensive The volume is organized chronologically with individual chapters addressing the roles of OSD the Army Navy and Air Force in two distinct periods The first roughly coinciding with President Truman s tenure covers the years from the end of World War II through the end of the Korean War in 1953 The second spans the two terms of the Eisenhower presidency from 1953 through early 1961 The year 1953 marked a natural breakpoint between the two periods The Korean War had ended President Eisenhower and his defense team began implementing the New Look a policy and strategy based on nuclear weapons which they believed would provide security and make it possible to reduce military spending The New Look s stress on nuclear weapons along with the deployment of the first operational guided missiles and the rapid advances subsequently made in nuclear and missile technology profoundly influenced acquisition in the services throughout the 1950s and the remainder of the century As used in this study the term acquisition encompasses the activities by which the United States obtains weapons and other equipment In surveying the history of acquisition between 1945 and 1960 this study discusses or refers in passing to many of the hundreds of weapon system programs initiated by the services in that period but it is not a weapons encyclopedia Instead it investigates a few major programs in depth in the belief that such detailed examination best reveals the evolution of acquisition policies organizations and processes and the various forces influencing weapons programs History of Acquisition in the Department of Defense ,2012 *History of Acquisition in the Department of Defense: Rearming for the Cold War, 1945-1960* Elliott Vanveltner Converse,2012 **Securing the MRAP** James Hasik,2021-08-16 Dwight D Eisenhower once quipped You will not find it difficult to prove that battles campaigns and even wars have been won or lost primarily because of logistics Military acquisition and procurement that is how a nation manages investments technologies programs and support is critical to wartime success or failure When unexpected battlefield problems arise how do the government the military and industry work together to ensure effective solutions During the American counterinsurgent campaign in Iraq the improvised explosive device emerged as a disruptive and devastating threat As Humvees and their occupants were ripped apart by IEDs it was clear that new solutions had to be found These solutions already existed but had not been procured highlighting the need for more effective marketing to the military by industry The ultimate successful response the mine resistant ambush protected vehicle or MRAP required years of entrepreneurial marketing by the defense industry In *Securing the MRAP Lessons Learned in Marketing and Military Procurement* James Hasik explores how these vehicles which the American military mostly rejected despite the great need for them eventually

came to be adopted as the Pentagon's top procurement priority. Hasik traces the story of the MRAP from the early 1970s to the future of mine resistant vehicles on the battlefields of tomorrow. An important contribution to the seemingly disparate fields of marketing and defense policy. Securing the MRAP is an eye opening revelation to defense industrialists, military officers and government officials who want to understand how to avoid another IED Humvee debacle. **War's Logic** Antulio J. Echevarria II, 2021-02-18. Antulio J. Echevarria II reveals how successive generations of American strategic theorists have thought about war. Analyzing the work of Alfred Thayer Mahan, Billy Mitchell, Bernard Brodie, Robert Osgood, Thomas Schelling, Herman Kahn, Henry Eccles, Joseph Wiley, Harry Summers, John Boyd, William Lind, and John Warden, he uncovers the logic that underpinned each theorist's critical concepts, core principles, and basic assumptions about the nature and character of war. In so doing, he identifies four paradigms of war's nature: traditional, modern, political, and materialist, that have shaped American strategic thought. If war's logic is political, as Carl von Clausewitz said, then so too is thinking about war. **The U.S. Navy** Thomas-Durell Young, 2021-07-28. Great power competition has returned to the world stage, and the U.S. Navy finds itself in the forefront of U.S. efforts to demonstrate national resolve. The U.S. Navy Case Studies in its Past, Present, and Future argues that the challenge of determining the future structure and operation of the fleet can be best achieved through an examination of its relevant past experience, as well as from current operations of the navy. After years of uncertainty as to its purpose and missions, the rise of China and Russian provocations now require U.S. officials to transform the fleet and its way of employing it. The contributors to this edition provide case studies of past, present, and future challenges that the U.S. Navy has and will need to overcome as it reconsiders how it will restructure the fleet and reconsider its prevailing concepts of operations. Contributors examine past challenges to structuring the fleet and its prevailing concepts of operation. Based on this foundation, case studies propose how navy leadership should consider developing and employing the fleet in the future. The chapters in this book were originally published as a special issue of Defense Security Analysis.

Defense Budgeting for a Safer World Michael J. Boskin, John N. Rader, Kiran Sridhar, 2023-11-01. America is facing the most dangerous and complex geopolitical environment since World War II. Ensuring the adequacy and flexibility of our defense budget is essential to keeping our nation secure and the world safe for global democracy. Defense Budgeting for a Safer World brings together the ideas, perspectives, and solutions of America's most renowned experts on national security and the defense budget. The volume originates from a conference held at the Hoover Institution in early 2023 and reflects the presentations, discussions, and debates among military and civilian leaders. Drawing on their remarkable experience leading the Pentagon, the services, Congress, and academe, these experts lay out the key priorities in reforming, realigning, and rightsizing the budget amid current challenges. Several topics converge: national security threats, strategy, technology, and innovation, personnel reform, options, and the politics of the defense budget. This unique compilation covers each of the major areas of debate in forging and sustaining a defense budget capable of supporting the nation's security needs. **Monetary**
