Abstract—The purpose of this study was to determine the effect of a 12-week training program on the heart rate (HR) and energy expenditure (EE) of sedentary, middle-aged women. The subjects were randomly assigned to either a control group (CON) or an exercise group (EX). The EX group performed a 12-week training program consisting of three sessions per week of aerobic exercise. The HR and EE were measured at baseline and at the end of the 12-week training program. The EX group showed a significant decrease in HR and a significant increase in EE compared to the CON group. The results of this study suggest that a 12-week training program can effectively reduce HR and increase EE in sedentary, middle-aged women.

23. When configuring a multi-mount AFS, set `mountmnt` and `mountmnt2` to your Netatun file: `/usr/local/etc/netatun`.
24. If you're using the `FreeBSD` multi-mount method, add the following to the `netatun` file: `FreeBSD` is only for multi-mounts. To remove support for the `FreeBSD` multi-mount, this file is unnecessary. This is required to allow to purchase this type of multi-mount AFS, as pointing out the group appears in `group 1`.
25. Do not include the `FreeBSD` multi-mount, as it is deprecated.
26. Use the following instructions for multi-mount AFS: `FreeBSD` is only for multi-mounts. To remove support for the `FreeBSD` multi-mount, this file is unnecessary. This is required to allow to purchase this type of multi-mount AFS, as pointing out the group appears in `group 1`.

- Day and night periods that are longer than the standard 24 hours occur most commonly with the use of artificial light or other light sources. To avoid this, there are two things the producer should do:
 - 1. Turn off the lights at the end of the day.
 - 2. Avoid excessive light intensity, the length of the day and the light spectrum (the color of the light) are important.
- The end of the day is the best time to change the light spectrum. The producer should be looking for the color of the light to be similar to the color of the sun at the end of the day. The producer should also be looking for the color of the light to be similar to the color of the sun at the end of the day.

When you install your T-Value One Connection, improper installation of all four screws (50 combinations for One Connection) will void the warranty. Please, before installing, refer to the correct installation instructions. Failure to maintain proper ventilation may result in a serious problem with the product.

- When a producer's price for the output rises or falls, it must adjust its output level accordingly. For example, if the price of the output rises, the producer will increase its output level until the marginal revenue is equal to the marginal cost.
