Stewart,1998 The Army must balance cost and training effectiveness in acquiring a Kiowa Warrior Crew Trainer KWCT This entails determining the least fidelity required for specific training objectives employing the least costly technology A fidelity analysis was conducted which involved a analysis of training requirements b review of the literature and c empirical assessment of a benchmark KWCT Subject matter experts SMEs identified 13 tasks for which training in the aircraft alone was inadequate It was concluded that the KWCT should train these tasks under the full range of visibility conditions and when affected by obscurants The literature revealed virtually no data on display resolution required to train tasks other than target detection and identification It also implied that a visual display system with adequate field of view FOV and resolution for target detection and identification at realistic standoff ranges would be prohibitively expensive For the benchmark KWCT assessment small sample size made performance evaluation difficult Gunnery was more affected by degraded depth cues when resolution was low 480 lines than when high 768 lines Low resolution was perceived as inadequate for all tasks and high resolution as marginally adequate for gunnery FOV was perceived as less critical to gunnery than to general flying      **The Transfer of Function of Equipment Publications Managed by the U.S. Army Aviation and Troop Command (ATCOM).** ,1998      **Current Aeromedical Issues in Rotary Wing Operations** ,1999 Given its

characteristics and the complexity of its use and its environment the helicopter is exposed to damage and a whole series of measures can be previewed to alienate this risk The presentations concentrated on five main topics 1 Crew training 2 The different conditions of use 3 The psycho physiological component 4 Survival equipment and methods and 5 Accidents and their prevention A careful reading of the papers presented at the symposium will enable both specialists and decision makers to make a summary assessment of the constraints of the missions on the one hand and on the other of the new methods of protection and training and the new technologies which will enable aircrew to carry out their missions in a safer environment In addition they will perhaps discover that helicopter operation can be optimised by a series of different devices and above all by judicious matching of type of helicopter type of aircrew training type of additional on board equipment **The 2002**
