School and District Leadership in an Era of Accountability Bruce G. Barnett, Alan R. Shoho, Alex J. Bowers, 2013-09-01 Our fourth book in the International Research on School Leadership series focuses on school leadership in an era of high stakes accountability Fueled by sweeping federal education accountability reforms such as the United States No Child Left Behind NCLB and Race to the Top R2T and Australia s Performance Measurement and Reporting Taskforce school systems around the world are being forced to increase academic standards participate in high stakes testing and raise evaluation standards for teachers and principals These results driven reforms are intended to hold educators accountable for student learning and accountable to the public Anderson 2005 p 2 emphasis in original While policymakers and the public debate the merits of student achievement accountability measures P 12 educational leaders do not have the luxury to wait for clear guidance and resources to improve their schools and operating systems Instead successful leaders must balance the need to create learning communities manage the organizational climate and encourage community involvement with the consequences testing has on teacher morale and public scrutiny The chapters in this volume clearly indicate that as school leaders attend to these potentially competing forces this affects their problem solving strategies ability to facilitate change and encourage community involvement We were delighted with the responses from colleagues around the world who were eager to share their research dealing with how leaders are functioning effectively within a high accountability environment The nine chapters in this volume provide empirical evidence of the strategies school leaders use to cope with problems and negotiate external demands while improving student performance In particular the voices and actions of principals superintendents and school board members are captured in a blend of quantitative and qualitative studies The breadth of studies is impressive ranging from case studies of individual principals to cross district comparisons to national data from the National Center for Education Statistics To highlight important findings we have organized the book into five sections The first section Chapters 2 3 and 4 highlights the problem solving strategies used by principals and superintendents when pressured to turn around low performing schools In the second section Chapters 5 and 6 attention is devoted to ways in which school leaders act as buffers by reducing the impact of external demands within their local school contexts Next Chapters 7 and 8 explore creative ways in which financial analyses can be used to assess the cost effectiveness of programs and services Chapters 9 and 10 examine how principals enact their instructional leadership roles in managing curriculum reforms and evaluating teachers Finally in the last section Chapter 11 Kenneth Leithwood synthesizes the major themes and ideas emerging across these chapters paying particular attention to practical issues influencing school leaders in this era of school reform and accountability as well as promising areas for future research **Win-Win** John A. Meier, Amanda Rutherford, 2016-08-22 Based on the 1 800 largest school districts in the United States over a decade The Politics of African American Education documents the status of African American education and the major role that partisanship plays The book brings together the most comprehensive database on minority education to date that centers around three arguments First partisanship permeates African American education it affects who is elected to the school board the racial composition of school administrators and teachers and the access of African American students to quality education Second African American representation matters The effectiveness of African American representation however is enhanced in Democratic districts while representation in Republican districts has little influence Third political structures matter but they are not determinative Two different structures election rules and the independent school district create the rules of the game in US education politics and policy but do not limit others from using those rules to change the outcome
