**War, Women and Post-conflict Empowerment** Josephine Beoku-Betts, Fredline A. M'Cormack-Hale, 2022-01-13 Since the 1991 2002 civil conflict ended in Sierra Leone the country has failed to translate the accomplishments of women s involvement in bringing the war to an end into meaningful political empowerment This is in marked contrast to other post conflict countries which have increased the political participation of women in elected and appointed office increased the representation of women in leadership positions and enacted constitutional reforms promoting women s rights Written by Sierra Leonean and Africanist scholars and experts from a broad range of disciplines this unique volume analyses the historical and contextual factors influencing women s political economic and social development in the country In drawing on a diverse array of case studies from health to education refugees to international donors the contradictions successes and challenges of women s lives in a post conflict environment are revealed making this an essential book for anyone involved in women and development

Indigenist African Development and Related Issues Akwasi Asabere-Ameyaw, Jophus Anamuah-Mensah, George Sefa Dei, Kolawole Raheem, 2014-07-11 There is no term so heavily contested in social science literature nomenclature than Development This book brings Indigenous perspectives to African development It is argued that contrary to development as we know it not working a greater part of the problem is that conventional development approaches that work have in fact not truly been followed to the letter and hence the quagmire All this is ironic since everything we do about our world is development So how come there is difficult knowledge when it comes to learning from what we know i e what local peoples do and have done for centuries as a starting point to reconstructing and reframing development In getting our heads around this paradox we are tempted to ask more questions How do we as African scholars and researchers begin to develop home grown solutions to our problems How do we pioneer new analytical systems for understanding our communities and offer a pathway to genuine African development i e Indigenist African development see also Yankah 2004 How do we speak of Indigenist development mindful of global developments and entanglements around us Can we afford to pursue development still mired in a catch up scenario Are we in a race with the development world and where do we see this race ending or where do we define as the finishing line A Publication of the Centre for School and Community Science and Technology Studies SACOST University of Education Winneba Ghana

**Socioculturally Responsive Assessment** Randy E. Bennett, Linda Darling-Hammond, Aneesha Badrinarayan, 2025-05-01

Socioculturally Responsive Assessment assembles the best available thinking from within and outside the educational measurement community about the theoretical foundations and systems level policy implications of formal assessment programs designed to be socioculturally responsive. Synthesized from culturally responsive assessment design and practices, culturally relevant pedagogy, and funds of knowledge, universal design for learning, the learning sciences, and other literatures, this emerging concept affirms that students' learning and performance is inextricably tied to the social, cultural, and linguistic contexts in which they live and develop knowledge. Across four sections, this book provides an argument and initial evidence for impact on students' users and assessment quality, offers guidance for implementation, and examines the potential limitations, pitfalls, barriers, and measurement issues that such programs will inevitably raise. Scholars, teaching faculty, test developers, and policymakers will come away with integral foundations, new assessment approaches, and a greater sense of the potential for positive impact that these assessments may afford. *The Grammar of Knowledge* Alexandra Y.

Aikhenvald, R. M. W. Dixon, 2014-02-28 *The Grammar of Knowledge* offers both a linguistic and anthropological perspective on the expression of information sources as well as inferences, assumptions, probability, and possibility, and gradations of doubt and beliefs in a range of languages. The book investigates twelve different languages from families including Tibeto-Burman, Nakh-Dagestani, and Austronesian, all of which share the property of requiring the source of information to be specified in every sentence. In these languages, it may not be possible to say merely that the man went fishing. Instead, the source of evidence for the statement must also be specified, usually through the use of evidential markers. For example, it may be necessary to indicate whether the speaker saw the man go fishing, has simply assumed that the man went fishing, or was told that he went fishing by a third party. Some languages, such as Hinuq and Tatar, distinguish between first-hand and non-first-hand information sources; others, such as Ersu, mark three distinct types of information: directly required, inferred, or assumed, and reported. Some require an even greater level of specification. Ashninka Peren from South America has a specific marker to express suspicions or misgivings. Like others in the series, the book illustrates and examines these aspects of language in different cultural and linguistic settings. It will interest linguists of all persuasions as well as linguistically minded anthropologists.

**Children, Childhood, and the Future** Andrea Kleeberg-Niepage, 2020-01-10 Although most of the world's children live in the Global South, much of the corpus of scientific knowledge which forms the basis of the current notion of good childhood worldwide is drawn from research on Western middle-class children. Even cross-cultural research often applies the Western model of childhood as the standard to which others must correspond. This volume serves to bridge this gap by both bringing up significant features of the development and socialisation of children in African countries and presenting cross-cultural procedures which help to discuss and develop differentiated and joint ideas about childhood instead of implementing one-sided standards which are disconnected from most children's lives. *The Impacts of Language and*

Literacy Policy on Teaching Practices in Ghana Philomena Osseo-Asare, 2021-03-15 This text critically examines changes in Ghanaian language and literacy policy following independence in 1957 to consider its impacts on early literacy teaching. By adopting a postcolonial theoretical perspective, the text interrogates the logic behind policy changes which have prioritised English local language or biliteracy. It draws on data from interviews with teachers and researcher observation to demonstrate how policies have influenced teaching and learning. Dr Osseo Asare's findings inform the development of a conceptual framework which highlights the socio cultural factors that impact the literacy and biliteracy of young children in Ghana, offering solutions to help teachers combat the challenges of frequent policy changes. This timely monograph will prove to be an essential resource not only for researchers working on education policies, teacher education and English language learning in postcolonial Ghana, but also for those looking to identify the thematic and methodological nuances of studying literacy and education in postcolonial contexts. *House Document*, 2014
