Posthuman Glossary Rosi Braidotti,Maria Hlavajova,2018-02-22 If art science and the humanities have shared one thing it was their common engagement with constructions and representations of the human Under the pressure of new contemporary concerns however we are experiencing a posthuman condition the combination of new developments such as the neoliberal economics of global capitalism migration technological advances environmental destruction on a mass scale the perpetual war on terror and extensive security systems with a troublesome reiteration of old unresolved problems that mean the concept of the human as we had previously known it has undergone dramatic transformations The *Posthuman Glossary* is a volume providing an outline of the critical terms of posthumanity in present day artistic and intellectual work It builds on the broad thematic topics of Anthropocene Capitalocene eco sophies digital activism algorithmic cultures and security and the inhuman It outlines potential artistic intellectual and activist itineraries of working through the complex reality of the posthuman condition and creates an understanding of the altered meanings of art vis vis critical present day developments It bridges missing links across disciplines terminologies constituencies and critical communities This original work will unlock the terms of the posthuman for students and researchers alike

Science Fiction and Posthumanism in the Anthropocene Jonathan Hay,2024-12-26 With science fiction stories imagining futures and worlds vastly different from our own and posthuman philosophies radically reconceptualising our species place within our own world this book is a deep dive

into the similarities between science fiction studies and critical posthumanism and how they can be read together Both fields fantasise about future technologies envisage alienness through conversation with everyday life and both anticipate the Anthropocene as a dire source of rupture from the present Drawing inspiration from these and other consonances this book establishes a common theoretical ground between the two fields upon which the two currents of future oriented thought can meet and begin to share a common language An investigation that draws critical currency from the everyday condition of our species in relation to technology and our perilous situation in the Anthropocene the book observes posthumanism not just as a theoretical framework that may be applied to science fictional ideas but also as an integral part of how it is that science fiction is generated Featuring case studies of the work of prominent authors Isaac Asimov Ursula K Le Guin and Kim Stanley Robinson alongside the BBC television series Doctor Who and the cult videogame Outer Wilds Science Fiction and Posthumanism in the Anthropocene formulates a new critical paradigm which recognises the value of such works to posthumanist thought Addressing those with an interest in either academic discipline it demonstrates that urgent discourses around our shared future are more imperative now than ever before

The (Un)Certain Future of Empathy in Posthumanism, Cyberculture and Science Fiction Elsa Bouet, 2019-01-04 This volume was first published by Inter Disciplinary Press in 2015 This volume investigates the future of empathy as contemplated by posthumanism cyberculture and science fiction As humanity increasingly networks and communicates online the reconfiguration of human communities through the removal and immediacy of the body challenges traditional notions of humanity and human capacity for empathy The impact of cyberculture and posthumanism on humanity and its capacity for empathy is here assessed through research in literature films neuroscience anthropology and philosophy This volume addresses the centrality of the body to human interactions and assesses how intrinsic it is to the defining of the human The exploration of posthuman narratives which display futuristic bodily modifications also engages with the anxieties and hopes for the future of human empathy Research in dystopian narratives shows that these anxieties are also expressed without the tropes of bodily modifications and that ideological distancing creates the conditions necessary for a lack of empathy towards otherness

Post-Human Institutions and Organizations Ismael Al-Amoudi, Emmanuel Lazega, 2019-11-11 When the Matrix trilogy was published in the mid 1980s it introduced to mass culture a number of post human tropes about the conscious machines that have haunted our collective imaginaries ever since This volume explores the social representations and significance of technological developments especially AI and human enhancement that have started to transform our human agency It uses these developments to revisit theories of the human mind and its essential characteristics a first person perspective concerns and reflexivity It looks at how the smart machines are used as agents of change in the basic institutions and organisations that hold contemporary societies together for example in the family and the household in commercial corporations in health institutions or in the military Its main purpose is to enrich the ongoing public discussion of the social and political implications of the smart machines by

looking at the extent to which they further digitalise and bureaucratised the world in particular by asking whether they are used to develop techno totalitarian societies that corrode normativity and solidarity Unveiling the Post-human Artur Matos Alves, 2020-04-28 This electronic book gathers twenty papers presented at the 6th Global Conference Visions of Humanity in Cyberculture Cyberspace and Science Fiction which took place in the Mansfield College of Oxford between the 12th and the 14th of July 2011 Children's Literature and the Posthuman Zoe Jaques, 2015-02-11 An investigation of identity formation in children's literature this book brings together children's literature and recent critical concerns with posthuman identity to argue that children's fiction offers sophisticated interventions into debates about what it means to be human and in particular about humanity's relationship to animals and the natural world In complicating questions of human identity ecology gender and technology Jaques engages with a multifaceted posthumanism to understand how philosophy can emerge from children's fantasy disclosing how such fantasy can build upon earlier traditions to represent complex issues of humanness to younger audiences Interrogating the place of the human through the non human whether animal or mechanical leads this book to have interpretations that radically depart from the critical tradition which in its concerns with the socialization and representation of the child has ignored larger epistemologies of humanness The book considers canonical texts of children's literature alongside recent bestsellers and films locating texts such as Gulliver's Travels 1726 Pinocchio 1883 and the Alice books 1865 1871 as important works in the evolution of posthuman ideas This study provides radical new readings of children's literature and demonstrates that the genre offers sophisticated interventions into the nature boundaries and dominion of humanity Palgrave Handbook of Critical Posthumanism Stefan Herbrechter, Ivan Callus, Manuela Rossini, Marija Grech, Megen de Bruin-Molé, Christopher John Müller, 2022-11-28 Palgrave Handbook of Critical Posthumanism is a major reference work on the paradigm emerging from the challenges to humanism humanity and the human posed by the erosion of the traditional demarcations between the human and nonhuman This handbook surveys and speculates on the ways in which the posthumanist paradigm emerged transformed and might further develop across the humanities With its focus on the posthuman as a figure on posthumanism as a social discourse and on posthumanisation as an on going historical and ontological process the volume highlights the relationship between the humanities and sciences The essays engage with posthumanism in connection with subfields like the environmental humanities health humanities animal studies and disability studies The book also traces the historical representations and understanding of posthumanism across time Additionally the contributions address genre and forms such as autobiography games art film museums and topics such as climate change speciesism anthropocentrism and biopolitics to name a few This handbook considers posthumanism's impact across disciplines and areas of study *Our Posthuman Past* David Edward Rose, 2021-06-09 Technological advances directly affect the human being's material existence and its self understanding The Enlightenment's intentional agent is due to specific technologies undergoing a fundamental transformation Yet if the ideological basis of this

understanding the justness of social luck is not rejected then a new understanding of the subject which would avoid unfreedom in the territorialization of the digital world is made impossible This book offers a novel Hegelian reading of the posthuman discipline in order to propose a new subjectivity **French Philosophy Today** Christopher Watkin, 2016-05-03 No detailed description available for French Philosophy Today *The Palgrave Handbook of Posthumanism in Film and Television* Michael Hauskeller, Curtis D. Carbonell, Thomas D. Philbeck, 2016-01-13 What does popular culture's relationship with cyborgs robots vampires and zombies tell us about being human Insightful scholarly perspectives shine a light on how film and television evince and portray the philosophical roots the social ramifications and the future visions of a posthumanist world *Designing the Domestic Posthuman* Colbey Emmerson Reid, Dennis M. Weiss, 2023-12-28 Ever since TIME magazine's 1983 Man of the Year was the PC we have been led to believe that our domestic spaces have been colonized by digital technology Too little attention has been paid to the domestic spaces and inhabitants impacted by this and critical posthumanism has been captured by a picture of humanity overly indebted to digital technologies and their largely male progenitors By applying feminist theory to posthumanism this work recovers the plethora of sophisticated human technology mediations associated with the home and practiced primarily by women the elderly infants the disabled and across cultures globally challenging dominant contemporary visions of a future humanity Authors Dennis M Weiss and Colbey Emmerson Reid look at various iterations of the posthuman and assert the need for alternative feminist readings that emphasize different standpoints from which to assess people places and products Chapters address the impact of posthumanism on design theory and look at familiar domestic objects with different attributes from those typically affiliated with technology and the future such as clothing textiles ceramics furniture and wallpaper They reveal their unhomely extra human qualities and offer a much needed perspective on domestic spaces and practices revivifying the home as a site of species transformation and pushing beyond traditional understandings of person mothering families and care giving to highlight a range of critically overlooked mediated materialisms and embodiments affiliated with domestic space By focusing on the neglected intersection of the posthuman with the home and exploring domestic posthuman design *Designing the Domestic Posthuman* offers a vision of a future humanity that retains identity integrity and considers our relationship to others to the world and things in it This book widens the lens of critical focus in posthumanism feminist philosophy and design and presents an alternative inclusive design framework for the future **Representations of the Post/human** Elaine L. Graham, 2002 This work draws together a wide range of literature on contemporary technologies and their ethical implications It focuses on advances in medical reproductive genetic and information technologies **The Future of Post-Human Performing Arts** Peter Baofu, 2013-01-03 Are the performing arts really supposed to be so radical that as John Cage once said in the context of music there is no noise only sound since he argued that any sounds we can hear can be music WK 2007a D Harwood 1976 This radical tradition in performing arts with music as an example here can be contrasted

with an opposing view in the older days when Greek philosophers and medieval theorists in music defined music as tones ordered horizontally as melodies and vertically as harmonies Music theory within this realm is studied with the presupposition that music is orderly and often pleasant to hear WK 2007a Contrary to these opposing traditions and other views as will be discussed in the book performing arts in relation to both the body and its presence is neither possible nor desirable to the extent that the respective ideologues on different sides would like us to believe Needless to say the challenge to these opposing traditions in performing arts does not imply that performing arts are worthless human endeavors or that those fields of study related to performing arts like aesthetics acoustics communication studies psychology culture studies sociology religion morality and so on should be rejected too Of course neither of these extreme views is reasonable Instead this book provides an alternative better way of understanding the future of performing arts especially in the dialectic context of the body and its presence while learning from different approaches in the literature but without favoring any one of them or integrating them since they are not necessarily compatible with each other In other words this book offers a new theory that is the transdisciplinary theory of performing arts to go beyond the existing approaches in a novel way If successful this seminal project will fundamentally change the way that we think about performing arts from the combined perspectives of the mind nature society and culture with enormous implications for the human future and what the author originally called its post human fate

Transhumanism and Posthumanism in Twenty-First Century Narrative Sonia Baelo-Allué, Mónica Calvo-Pascual, 2021-05-05 *Transhumanism and Posthumanism in Twenty First Century Narrative* brings together fifteen scholars from five different countries to explore the different ways in which the posthuman has been addressed in contemporary culture and more specifically in key narratives written in the second decade of the 21st century by Dave Eggers William Gibson John Shirley Tom McCarthy Jeff Vandermeer Don DeLillo Margaret Atwood Cixin Liu and Helen Marshall Some of these works engage in the premises and

perils of transhumanism while others explore the qualities of the post human in a variety of dystopian futures marked by the planetary influence of human action From a critical posthumanist perspective that questions anthropocentrism human exceptionalism and the centrality of the human subject in the era of the Anthropocene the scholars in this collection analyse the aesthetic choices these authors make to depict the posthuman and its aftereffects

Posthumanism and India

Debashish Banerji, Md. Monirul Islam, Samrat Sengupta, 2024-12-10 The book is about what posthumanism means in the contemporary Indian context and what different lines of consideration this can take The world today has universalized a Eurocentric history of the human with its privileges oppressions exploitations and exclusions On the one hand this has led to the triumphalist narrative of technology the blurring of biological embodiment through prostheses and the dream of transhumanist self exceeding On the other hand we are witness to the contemporary eruption of dystopian anomalies due to the dis balance or revolt of the others of humanism climate crisis chronic pandemic religious ethnocentric and geopolitical violence ideological and authoritarian state control Posthumanism is both an acknowledgement of these blurred boundaries of humanism and a critical response to it The editors of this volume opine that the discourse of posthumanism in India warrants urgent consideration if we are to adequately address both national and global emergencies and look for solutions that India may be in a unique position to offer Essays in the volume are by scholars in the area dealing with representative directions relating to posthumanism in India The essays are divided into five areas of cultural relevance 1 internal selves and others 2 technology normativity and ethics 3 human and animal 4 bodies and their discards 5 becoming cosmos Together they form the beginnings of an approach to a critical cartography of posthumanism as it pertains specifically to India

Mimetic Posthumanism ,2024-10-21 It is tempting to affirm that on and about November 2022 post human character changed The revolution in A I simulations certainly calls for an update of the ancient realization that humans are imitative animals or homo mimeticus But the mimetic turn in posthuman studies is not limited to A I from simulation to identification affective contagion to viral mimesis robotics to hypermimesis the essays collected in this volume articulate the multiple facets of homo mimeticus 2 0 Challenging rationalist accounts of autonomous originality internal to the history of Homo sapiens this volume argues from different artistic philosophical technological perspectives that the all too human tendency to imitate is paradoxically central to our ongoing process of becoming posthuman
