amendment requirements The trite threefold separation of powers is more metaphorical than real and therefore unable to secure effective checks and balances Though institutionally separated with their own personnel and functions the three powers are ordinarily integrated in a single dominant political leadership committed to achieving the same ideological goals The bill of individual rights cannot guarantee justice because rights are subject to the ideologically driven exercise of judicial interpretation often with damaging consequences for those relying on the bill of rights This situation does not only apply to South Africa but to all Constitutions premised on the same articles of faith in this book described as the doctrine of statist individualist constitutionalism An improved mode of constitutionalism is called for one which is equipped with a sounder system of checks and balances and better endowed towards the achievement of justice through a balanced constitution

States of exclusion Nicolaas Buitendag, 2023-03-01 The theoretical underpinnings of public international law have taken the sovereign status of the nation state for granted since the beginning of the modern era After centuries of evolution in legal and political thought the state's definition as a bounded territorial unit has been strictly codified The legal development of the nation state was an ideological project informed by extra legal considerations Additionally the ever narrowing scope of the juridical idea of sovereignty functioned as a boundary mechanism instrumental in colonising Africa and other regions While international law claims universal liberalism today the current system based on sovereign nation states represents not social inclusion but fierce and dangerous exclusion The central thesis of this book is that the development of legal sovereignty was rather than part of the modernist progress narrative a historically contingent evolutionary regression While other social systems such as economics and science became globalised politics and law counterintuitively became more territorialised It is argued that the nation state today is not only anachronistic but is dangerously ill equipped for facing international problems such as the climate crisis or global pandemics Finally it also leaves African states and many other formerly colonised territories at a particular disadvantage by regulating their political practices into a predefined mould
