

Impact of Poverty on the Society Example

This is a very challenging question because nearly every “pressing problem or social issue” has underlying factors and historical influences. So I will try to explain my understanding of these topics. There are two important lenses from which to consider this issue; first, from the individual circumstance and second, from specific community conditions.

The inability of individuals to earn enough money to afford to meet their basic needs and maintain a healthy lifestyle is, in my opinion, the most pressing issue. People who live in poverty, by definition, have a fewer economic resources and thus a lack of choices. The choices that people with limited resources make include where they can afford to live, the opportunity to obtain medical care, the quality of food they are able to consume, the type of childcare they can access and many other choices that influence the health and the future outcomes of themselves and their children. Unfortunately, when an unexpected expense occurs (car repair, medical issue, divorce, etc.), families may find themselves unable to pay their rent and face eviction. When an individual loses their job, eviction may happen quickly. Losing a home is not only a result of poverty but can also make it many times more difficult to recover. According to Save the Family (Arizona Republic, May 23, 2018), it is much more difficult to help a family once they become homeless than it is to help them stay in their home.

From the individual perspective, job opportunities may be limited by low educational attainment, lack of childcare, health issues, previous legal or money issues, or other challenges. Any of these issues may leave an individual with few choices to earn a living wage. From the community perspective, limited low-income housing options can force families to live in less than ideal circumstances. While children are young, low-income families may not be able to afford quality childcare or worse, leaving them with older children or in situations that are questionable at best. Families living in poverty (even with a fully employed adult) often cannot meet their basic needs without additional community support. People working minimum wage jobs, or slightly above, cannot support a family and may work a second job, which can lead to additional challenges, leaving children without appropriate supervision.

From the community environment perspective, when rental rates increase, low-income families have more difficulty affording a place to live. According to SmartAsset.com, a personal finance research firm, Phoenix is ranked number 9 on the list of U.S. cities where workers need to work the most hours in order to afford an apartment. In addition, lack of knowledge of renter's rights may encourage landlords to abuse their power. Knowledge of these rights paired with basic financial education and community support can help families retain their rental housing and decrease evictions.

Poverty Policy and Poverty Research Robert H. Haveman, 1997-05-15 The War on Poverty instituted in 1965 during the administration of Lyndon B Johnson was one of the chief elements of that president's Great Society initiative This book describes and assesses the major social science research effort that grew up with and in part because of these programs Robert H Haveman's objective is to illuminate the process by which social and political developments have an impact on the direction of progress in the social sciences Haveman identifies the policy measures most closely tied to the War on Poverty and the Great Society and describes the nature of these policies and their growth from 1965 to 1980 He examines the extent and growth of resources devoted to the poverty related research that accompanied these programs and assesses the impact of the growth in this research commitment over the 1965-1980 period Haveman's was the first full overview of recent poverty related research and an overview of methodological developments in the social sciences in the post 1965 period which were stimulated by the antipoverty effort *Handbook of Research on Economic and Social Well-Being* Conchita

D'Ambrosio, 2018-03-30 The past decade has been characterized by a burgeoning interest in new concepts of individual and social well being The impetus for this new research has stemmed from increased demand from policy makers and civil society for measures of progress that go beyond the traditional measures of GDP as well as improved datasets allowing individuals and households to be tracked over their life course The aim of this Handbook is to chart these developments and provide extensive surveys of many of the recent themes that have emerged in the research literature Some of the topics addressed include poverty relative deprivation and satisfaction economic insecurity social exclusion and inequality income and social polarization and social fractionalization and diversity Each topic is first analyzed from a theoretical perspective followed by detailed empirical discussion **Compendium of HHS Evaluations and Relevant Other Studies**, 1990

Exclusion and Poverty in India and Central Asia Chittaranjan Senapati, 2016-09-09 The early years of 1990s economic reform and change has neglected social sectors both in India and Central Asia As a result poverty has also increased in India and Central Asian countries The economic political and social situation has worsened in all Central Asian states due to transition from command economy to market economy The early 1990s political decision has been dominated by a narrowly conceived version of economic policy for both India and Central Asia As a result the quality and the structure of social protection changed in a negative way Indeed in some cases the pursuit of a strict economic orthodoxy has left various sections of the community marginalized and alienated Both the societies confront a number of challenges that is as profound as the economic changes of the past The process of globalization and technical change has influenced economy and society in complex ways including raising expectations of consumption and remuneration for skilled knowledge workers creating greater demand for some information skills and services causing unemployment amongst those with few qualifications and destabilizing some traditional ways of life and increasing social exclusion It detaches groups and individuals from social relations and institutions and prevents them from full participation

in the normal activities of the society In India and Central Asia communities face social exclusion on the basis of their identity as ethnic groups socio economic groups religious community and gender Inclusive development therefore is essential and it should be the top priority in development programs of India and Central Asia Research in this area has not been touched upon so far Since Central Asian countries are relatively new and trying to establish their democratic institutions this piece of work will be helpful for their nation building processes So far as the mutual benefit for both the regions is concerned India is an old democracy and its inclusive policy can be lessons for Central Asian countries On the other hand the experience of Central Asias policy implementation can be a lesson for India This piece of work has potential impulses to policy makers academicians and researchers of these five Central Asian countries and India This work can make a distinction than the conventional researcher in India by focusing on development studies social exclusion inclusive policies and comparative studies in international developments Key words social exclusion poverty deprivation development diversity India Central Asia Kazakhstan Kyrgyzstan Tajikistan Turkmenistan and Uzbekistan

Barrett,Peter Little,Michael Carter,2013-10-21 Prior work has shown that there is a significant amount of turnover amongst the African poor as households exit and enter poverty Some of this mobility can be attributed to regular movement back and forth in response to exogenous variability in climate prices health etc churning Other crossings of the poverty line reflect permanent shifts in long term well being associated with gains or losses of productive assets or permanent changes in asset productivity due for example to adoption of improved technologies or access to new higher value markets Distinguishing true structural mobility from simple churning is important because it clarifies the factors that facilitate such important structural change Conversely it also helps identify the constraints that may leave other households caught in a trap of persistent structural poverty The papers in this book help to distinguish the types of poverty and to deepen understanding of the structural features and constraints that create poverty traps Such an understanding allows communities local governments and donors to take proactive effective steps to combat persistent poverty in Africa This book was previously published as a special issue of the Journal of Development Studies **Handbook of Globalisation and Development** Kenneth A. Reinert,2017-03-31 Characterised by conceptual diversity the Handbook of Globalisation and Development presents contributions from prominent international researchers on all aspects of globalisation and carefully considers their role across a whole host of development processes The Handbook is structured around seven key areas international trade international production international finance migration foreign aid a broader view and challenges Adopting a multi disciplinary approach the section on a broader view delves into dimensions of globalisation and development that go beyond the mere economic such as culture technology health and poverty Carefully crafted the chapters herein offer a rigorous and comprehensive assessment of the available research to date and provide an assessment of policy options across all areas considered **Economic Exclusion and Discrimination: The Experiences of Minorities and Indigenous Peoples** Patricia Justino,Julie Litchfield,2003-08-08 This issues paper aims to evaluate the link between economic exclusion and discrimination against ethnic religious and linguistic minorities and indigenous peoples Non discrimination is one of the most fundamental human rights recognized in international law and most national constitutions yet discrimination against minorities persists This implies huge costs for individuals and communities that are discriminated against and society in general Although as the authors of this paper point out there are difficulties over definitions and data limitations there is evidence to show that across diverse regions minorities and indigenous peoples experience higher levels of poverty less access to education health care and basic services and have fewer employment opportunities than the general population Hence minorities and indigenous peoples are more likely to suffer economic and social and political exclusion than other groups Development actors do not well understand the relationship between discrimination and poverty This paper

argues that discrimination is an important element in economic exclusion and must be addressed to establish sustainable development **Resources in Education** ,1998 **The SAGE Handbook of Housing Studies** David F Clapham,William A V Clark,Kenneth Gibb,2012-04-20 Cross disciplinary and critical in its approach The SAGE Handbook of Housing Studies is an elucidating look at the key issues within the field It covers the study of housing retrospectively but also analyses the future directions of research and theory demonstrating how it can contribute to wider debates in the social sciences A comprehensive introductory chapter is followed by four parts offering complete coverage of the area Markets examines the perception of housing markets how they function in different contexts and the importance of housing behaviour and neighbourhoods Approaches looks at how other disciplines economics geography and sociology have informed the direction of housing studies Context traces the interactions between housing studies and other aspects of society providing context to debate housing through issues of space social welfare and the environment Policy is a multi disciplinary and comprehensive take on the major policy issues and the causes and possible solutions of housing problems such as regeneration and homelessness Edited by leading names in the field and including international contributions the book is a stimulating wide ranging read that will be an invaluable resource for academics and researchers in geography urban studies sociology social policy economics and politics
