an Ice Age World Rolf Witzsche, 2005 Mankind is the child of the Ice Age Our more than 2 million year history extends through the entire Pleistocene Ice Age Epoch We were shaped by the need to be creative to survive and still are Now that our warm interglacial epoch is nearly over we find ourselves challenged to be creative once again as the global agriculture and with it our food supply will be radically diminished once we get back into the Ice Age World Can we protect our agriculture in indoor facilities That sounds like science fiction right It will take a hundred years to do it But will we upgrade our human dimension to do it especially in the way we relate to one another as human beings We are deeply divided to the very grassroots social level and isolated The needed Ice Age Renaissance requires a taller foundation The novel explores the countless dimensions that are involved in breaking the ice in our social domain at the level of sexual and marital division and isolation towards becoming sublime as human beings The great renaissance principles of universal love and of the advantage of the other are threaded through the story putting a new light on sex and marriage relationships and expanding them into the universal dimension This novel is Episode 2B of the science fantasy series The Lodging for the Rose by Rolf A F Witzsche

The Works of Fumito Ueda Damien Mecheri, 2019-05-21 Go behind the scenes of the creation of the Fumito Ueda trilogy Fumito Ueda has worked on 3 games ICO Shadow of the Colossus and The Last Guardian Each of them was able to express the depth of their author's reflection his love of purity and showed a real poetry Are video games art This study of the Fumito Ueda's work focuses on the question of the artistic essence of video games EXTRACT When the game ICO was released in 2001 it had several decades worth of video games behind it The game itself was significantly influenced by video games that had touched its creator Fumito Ueda Another World by Eric Chahi and Prince of Persia by Jordan Mechner Yet when a player takes the ethereal Yorda's hand when they feel this physical contact through the vibrations in the controller something happens Something new and profound Something that can only exist through a video game A simple idea attached to the R1 button and digital interaction opens a new door Of course this insignificant seeming gesture is but a small representation of what can really happen Its strength lies elsewhere it draws from everything that makes up ICO its art direction everything in chiaroscuro its vanishing lines its simple and clear game mechanics its lack of visual interface its quest for physical realism its minimalist narration its extraordinary sensibilities It is an opening to an evocative otherworld that lets our imagination soar Contemplative slow and nearly speechless ICO offers an uncommon poetic adventure rejecting traditional video game standards while still drawing from them Many remained indifferent to it Just as many were touched as rarely before ABOUT THE AUTHOR Passionate about films and video games Damien Mecheri joined the writing team of Gameplay RPG magazine in 2004 and wrote several articles for the second special edition on the Final Fantasy saga With this same team Damien continued his work in 2006 for another publication known as Background before continuing the adventure online in 2008 with Gameweb.fr Since 2011 he has written and co-written numerous works for Third Editions including The Legend of Final Fantasy X Dark Souls Beyond the Grave and Welcome to Silent Hill Journey to the Center of

Jack Copeland,2012-11-29 Alan Turing is regarded as one of the greatest scientists of the 20th century But who was Turing and what did he achieve during his tragically short life of 41 years Best known as the genius who broke Germany s most secret codes during the war of 1939 45 Turing was also the father of the modern computer Today all who click to open are familiar with the impact of Turing s ideas Here B Jack Copeland provides an account of Turing s life and work exploring the key elements of his life story in tandem with his leading ideas and contributions The book highlights Turing s contributions to computing and to computer science including Artificial Intelligence and Artificial Life and the emphasis throughout is on the relevance of his work to modern developments The story of his contributions to codebreaking during the Second World War is set in the context of his thinking about machines as is the account of his work in the foundations of mathematics **The Essential Turing** B. Jack. Copeland,2004-09-09 Alan Turing pioneer of computing and WWII codebreaker is one of the most important and influential thinkers of the twentieth century In this volume for the first time his key writings are made available to a broad non specialist readership They make fascinating reading both in their own right and for their historic significance contemporary computational theory cognitive science artificial intelligence and

artificial life all spring from this ground breaking work which is also rich in philosophical and logical insight An introduction by leading Turing expert Jack Copeland provides the background and guides the reader through the selection About Alan Turing Alan Turing FRS OBE 1912 1954 studied mathematics at King s College Cambridge He was elected a Fellow of King s in March 1935 at the age of only 22 In the same year he invented the abstract computing machines now known simply as Turing machines on which all subsequent stored program digital computers are modelled During 1936 1938 Turing continued his studies now at Princeton University He completed a PhD in mathematical logic analysing the notion of intuition in mathematics and introducing the idea of oracular computation now fundamental in mathematical recursion theory An oracle is an abstract device able to solve mathematical problems too difficult for the universal Turing machine In the summer of 1938 Turing returned to his Fellowship at King s When WWII started in 1939 he joined the wartime headquarters of the Government Code and Cypher School GC CS at Bletchley Park Buckinghamshire Building on earlier work by Polish cryptanalysts Turing contributed crucially to the design of electro mechanical machines bombes used to decipher Enigma the code by means of which the German armed forces sought to protect their radio communications Turing s work on the version of Enigma used by the German navy was vital to the battle for supremacy in the North Atlantic He also contributed to the attack on the cyphers known as Fish Based on binary teleprinter code Fish was used during the latter part of the war in preference to morse based Enigma for the encryption of high level signals for example messages from Hitler and other members of the German High Command It is estimated that the work of GC CS shortened the war in Europe by at least two years Turing received the Order of the British Empire for the part he played In 1945 the war over Turing was recruited to the National Physical Laboratory NPL in London his brief to design and develop an electronic computer a concrete form of the universal Turing machine Turing s report setting out his design for the Automatic Computing Engine ACE was the first relatively complete specification of an electronic stored program general purpose digital computer Delays beyond Turing s control resulted in NPL s losing the race to build the world s first working electronic stored program digital computer an honour that went to the Royal Society Computing Machine Laboratory at Manchester University in June 1948 Discouraged by the delays at NPL Turing took up the Deputy Directorship of the Royal Society Computing Machine Laboratory in that year Turing was a founding father of modern cognitive science and a leading early exponent of the hypothesis that the human brain is in large part a digital computing machine theorising that the cortex at birth is an unorganised machine which through training becomes organised into a universal machine or something like it He also pioneered Artificial Intelligence Turing spent the rest of his short career at Manchester University being appointed to a specially created Readership in the Theory of Computing in May 1953 He was elected a Fellow of the Royal Society of London in March 1951 a high honour
