

Oh Deer

Game

Divide students into two groups. One group will be the deer and the other group will represent the environment. Each group stands on one end of the field or gym.

The students in the environment group each choose to be food, water, or shelter. It does not matter who chooses what. If they are water they will put their hand over their mouth, food will put their hand on their stomach and shelter will put their hands over their head. The deer also choose a symbol. This represents what they are looking for.

When the teacher says "Oh Deer", both groups will turn to face each other. The deer must run across the field or gym to find whatever symbol they are looking for. If they do not find it they become part of the environment. If they do find it they link arms with the other person and that person becomes a deer. They run back to the deer side.

Play 8-10 rounds. Record the deer in each round. Later, make a line graph to represent the deer population in each round. Discuss the data to show students how a population maintains balance. Use the True or False questions to informally assess what students learned from the activity.

Multiple Intelligences in the Elementary Classroom Susan Baum, Julie Viens, Barbara Slatin, 2005-08-26 This book will help teachers design effective curriculum for their students with diverse learning abilities The authors have created a guided process to apply MI theory to the elementary school classroom The five pathways or approaches examined Exploration Bridging Understanding Authentic Problems and Talent Development represent the ways in which MI can be implemented and nurtured across the elementary grades The Pathways Model promotes and supports the development of a well grounded understanding of MI theory to inform goal setting and planning for using multiple intelligences theory in the classroom Each pathway addresses a different set of goals and provides appropriate guidelines and examples

The Science Teacher, 1998 Some issues are accompanied by a CD ROM on a selected topic

The Inclusion of Environmental Education in Science Teacher Education Alec Bodzin, Beth Shiner Klein, Starlin Weaver, 2010-08-13 In the coming decades the general public will be required ever more often to understand complex environmental issues evaluate proposed environmental plans and understand how individual decisions affect the environment at local to global scales Thus it is of fundamental importance to ensure that higher quality

education about these ecological issues raises the environmental literacy of the general public In order to achieve this teachers need to be trained as well as classroom practice enhanced This volume focuses on the integration of environmental education into science teacher education The book begins by providing readers with foundational knowledge of environmental education as it applies to the discipline of science education It relates the historical and philosophical underpinnings of EE as well as current trends in the subject that relate to science teacher education Later chapters examine the pedagogical practices of environmental education in the context of scienceteacher education Case studies of environmental education teaching and learning strategies in science teacher education and instructional practices in K 12 science classrooms are included This book shares knowledge and ideas about environmental education pedagogy and serves as a reliable guide for both science teacher educators and K 12 science educators who wish to insert environmental education into science teacher education Coverage includes everything from the methods employed in summer camps to the use of podcasting as a pedagogical aid Studies have shown that schools that do manage to incorporate EE into their teaching programs demonstrate significant growth in student achievement as well as improved student behavior This text argues that the multidisciplinary nature of environmental education itself requires problem solving critical thinking and literacy skills that benefit students work right across the curriculum
