By claiming that it does not necessarily belong to any one mind in particular is inferring then that the self is not in fact a property. Then how can it be said to exist? Thomas Reid (Macquarie, lecture 17) also raises an important objection to Locke's theory of personal identity that seems fairly self-evident to me. We can consider a man as: a child, then in middle age and at old age. If the man in middle age can remember occurrences when he was a young boy, but now that he is an old man can't, then can he be considered a different person from the young boy?

Of Personal Identity Hume

According to Locke the old man is the same as the middle aged one, and the middle aged is the same as the child. Yet there is no continuity of consciousness between the three, any break in memory would render them a 'non-person' if we follow Locke's argument-clearly it is logically inconsistent. David Hume's 'bundle theory' of the self seems to me rather more logically coherent. He claimed that humans tend to think of themselves as the same person as they were, say, 10 years ago; that we believed that although one had evolved over the period in a number of ways that the self had endured.

According to Hume however, this was a mistake, and when examined empirically no more than a practical habit: "I never can catch myself at any time without a perception, and never observe anything but the perception"(TI, vi, p. 251). It is clear, posits Hume, our thoughts and perceptions flow from one idea to the next; so we encounter a 'bundle', or grouping, of perceptions throughout our life but no actual continuous and enduring underlying self- or "I" -as a 'unity of consciousness'.

While there is a stability of perceptions over the short term, and some loose association of experiences, there is no overarching continuity of "I" in reality. Hume agrees that we extend over time in actions, we begin a job and finish it some time later, and that our desires also extend in some sort of continuity over time. Furthermore our physical bodies endure reasonably consistently; we age gradually. This according to Hume is what ultimately defines our sense of personal identity. While Hume's theory of the self is attractive in my view, if anything it doesn't go far

Noonan, 2013-03-09 Identity has for long been an important concept in philosophy and logic Plato in his *Sophist* puts same among those forms which run through all others The scholastics inherited

the idea and the terminology classifying same as one of the transcendentals i.e. as running through all the categories. The work of Locke and Leibniz made the concept a problematic one. But it is rather recently i.e. since the importance of Frege has been generally recognized that there has been a keen interest in the notion formulated by him of a criterion of identity. This at first sight harmless as well as useful has proved to be like a charge of dynamite. The seed had indeed been sown long ago by Euclid. In Book V of his *Elements* he first gives a useless definition of a ratio. A ratio is a sort of relation between two magnitudes in respect of muchness. But then in definition 5 he answers not the question What is a ratio but rather What is it for magnitudes to be in the same ratio and this is the definition that does the work. *The Identities of Persons* Amélie Rorty, 1976-11-15. In this volume thirteen philosophers contribute new essays analyzing the criteria for personal identity and their import on ethics and the theory of action. It presents contemporary treatments of the issues discussed in *Personal Identity* edited by John Perry. University of California Press 1975. **Personal Identity and Resurrection** Georg Gasser, 2010. In *Personal Identity and Resurrection* leading philosophers and theologians present an indispensable resource for anyone interested in the doctrine of bodily resurrection. Be they philosophers, theologians, scholars in religious studies or believers interested in examining their faith. Hume on the Self and Personal Identity Dan O'Brien, 2022-08-30. This book brings together a team of international scholars to attempt to understand David Hume's conception of the self. The standard interpretation is that he holds a no self view: we are just bundles of conscious experiences, thoughts and emotions. There is nothing deeper to us: no core, no essence, no soul. In the Appendix to *A Treatise of Human Nature* though Hume admits to being dissatisfied with such an account. Part One of this book explores why this might be so. Part Two turns to Books 2 and 3 of the *Treatise* where Hume moves away from the fiction of a simple self to the complex idea we have of our flesh and blood selves: those with emotional lives, practical goals and social relations with others. In Part Three connections are traced between Hume and Madhyamaka Buddhism, Husserl and the phenomenological tradition and contemporary cognitive science.

Personal Identity Ellen Frankel Paul, Fred Dycus Miller, Jeffrey Paul, 2005. What is a person? What makes me the same person today that I was yesterday or will be tomorrow? Philosophers have long pondered these questions. In Plato's Symposium Socrates observed that all of us are constantly undergoing change: we experience physical changes to our bodies as well as changes in our manners, customs, opinions, desires, pleasures, pains and fears. Aristotle theorized that there must be some underlying substratum that remains the same even as we undergo these changes. John Locke rejected Aristotle's view and reformulated the problem of personal identity in his own way: is a person a physical organism that persists through time or is a person identified by the persistence of psychological states by memory? These essays written by prominent philosophers and legal and economic theorists offer valuable insights into the nature of personal identity and its implications for morality and public policy. **Inquiries in Psychoanalysis: Collected papers of Edna O'Shaughnessy** Edna O'Shaughnessy, 2014-10-10. The papers of Edna O'Shaughnessy are among the finest to be found in psychoanalytic writing.

Her work is unified not so much by its subject matter which is diverse but by her underlying preoccupations including the nature of psychic reality and subjectivity and the psychic limits of endurance and reparation Here a selection of her work edited and with an introduction by Richard Rusbridger is brought together in a collection which demonstrates the contribution that O Shaughnessy has made to many areas of psychoanalysis from personality organisations the superego psychic refuges and the Oedipus complex to the subject of whether a liar can be psychoanalysed *Inquiries in Psychoanalysis* is a record of clinical work and thinking over sixty years of psychoanalytic practice with children and adults This wide ranging selection of work will be essential reading for psychoanalysts psychotherapists and students
