Place Value Task Cards:

Transition Math Task Cards ETC Montessori Digital, More and more students are moving into the upper elementary classroom without having achieved abstraction in multiplication and as a result are not introduced to the whole number division sequence Furthermore we found that students continue to be weak in their multiplication facts particularly those facts pertaining to 6s 7s 8s and 9s This lack of achievement in abstraction and consequential weakness in understanding results in the inability of children to participate in more advanced multiplication presentations Our findings are particularly problematic since the mathematical sequence for both the advanced fractions and decimals assumes mastery of all whole number operations Having taken all of these facts into consideration we designed the Transition Math Task Cards for Level 9 12 With the understanding that teachers must bridge these gaps while meeting math standards we believe that this program is a viable sequence to help children move forward The task cards provide ample opportunities for fact acquisition and pertinent mathematical comprehension of what happens when multiplying by factors of ten Children are also introduced to single and double digit division allowing them to understand the relationship that exists between the two operations
