Complexity, Management and the Dynamics of Change Elizabeth McMillan, 2008-08-28 Introducing the principles of complexity science this innovative text illustrates how different kinds of organizational can become more effective democratic and sustainable by using these powerful ideas

Inner Space/Outer Space Edward Kolb, Fermi National Accelerator Laboratory, 1986-04 Inner Space Outer Space brings together much of the exciting work contributing to a new synthesis of modern physics Particle physicists concerned with the inner space of the atom are making discoveries that their colleagues in astrophysics studying outer space can use to develop and test hypotheses about the events that occurred in the microseconds after the Big Bang and that shaped the universe as we know it today The papers collected here from scores of scientists constitute the proceedings of the first major international conference on research at the interface of particle physics and astrophysics held in May 1984 The editors have written introductions to each major section that draw out the central themes and elaborate on the primary implications of the papers that follow

Energy Research Abstracts, 1987 Origin Of Mass And Strong Coupling Gauge Theories (Scgt 15) - Proceedings Of The Sakata Memorial Kmi Workshop Yasumichi Aoki, Toshihide Maskawa, Shin'ichi Nojiri, Masaharu Tanabashi, Koichi Yamawaki, 2017-12-06 This volume contains contributions to the workshop which was largely focused on the strong coupling gauge theories in search for theories beyond the standard model particularly the LHC experiments and lattice studies of conformal fixed point The main topics include walking technicolor and the role of conformality in view of the 125 GeV Higgs as a light composite Higgs technidilaton and other composite Higgs etc Nonperturbative studies like lattice simulations and stringy holographic approaches are extensively discussed in close relation to the phenomenological studies After the discovery of 125 GeV Higgs at LHC the central issue of particle physics is now to reveal the dynamical origin of the Higgs itself One of the possibilities would be the composite Higgs based on the strong coupling gauge theory in the TeV region such as the technidilaton predicted in walking technicolor with infrared conformality The volume contains among others many of the latest important reports on walking technicolor and related subjects in the general context of conformality in a way of direct relevance to the LHC phenomenology as well as the lattice studies It is very timely to study full theoretical implications in the exciting era when the LHC is vigorously working This volume is of great importance for that purpose Speakers of 40 talks plus posters include K I Aoki Y Aoki K Bamba E Bennett R S Chivukula H Georgi A Hasenfratz D K Hong K Itoh D Elander G Fleming H Fukano Y Iwasaki M Jarvinen D Kadoh S Kim R Kitano K I Kondo J Kuti D Lin N Maru H Matsufuru S Matsuzaki K I Nagai C Nonaka H Ohki E Pallante M Rho E Rinaldi F Sannino D Schaich A Shibata R E Shrock E H Simmons K Tuominen C H Wong N Yamada M J S Yang and K Yamawaki

Peelle,Arthur Wingfield,2015-06-03 Efficient auditory processing requires the rapid integration of transient sensory inputs This is exemplified in human speech perception in which long stretches of a complex acoustic signal are typically processed accurately and essentially in real time Spoken language thus presents listeners auditory systems with a considerable challenge even when acoustic input is clear However auditory processing ability is frequently compromised due to congenital or acquired hearing loss or altered through background noise or assistive devices such as cochlear implants How does loss of sensory fidelity impact neural processing efficiency and health How does this ultimately influence behavior This Research Topic explores the neural consequences of hearing loss including basic processing carried out in the auditory periphery computations in subcortical nuclei and primary auditory cortex and higher level cognitive processes such as those involved in human speech perception By pulling together data from a variety of disciplines and perspectives we gain a more complete picture of the acute and chronic consequences of hearing loss for neural functioning
