or Kenneth Pomeranz But it is often difficult to understand the position they are coming from and for readers to understand clearly how Europe made the transition from merely one of many developing civilizations to the world's first industrial power In this volume Jonathan Daly introduces us to the main interpretations of Europe's rise that have been proposed over the past half century and presents the views of these historians and schools of scholarship advocating for each point of view and letting each author speak for him or herself through the inclusion of brief textual selections Also included are interesting biographical details for each scholar as well as a list of further reading for each chapter and a collection of maps An ideal introduction for students of world history
