Educating for Creativity within Higher Education

Phillip McIntyre, Janet Fulton, Elizabeth Paton, Susan Kerrigan, Michael Meany, 2018-07-04 This book provides innovative insights into how creativity can be taught within higher education Preparing students for employment in a dynamic set of global creative industries requires those students to not only be resilient and entrepreneurial but also to be locally focused while being globally aware Therefore it is imperative that they acquire a thorough understanding of creative processes and practice as they try to keep pace with worldwide digital trends As the creation of media messages is a fundamental aspect of global creative industries and that numerous concerns practitioners face are based upon a certain understanding of creativity the authors propose an exploration of what creativity is in terms of research and then apply it pedagogically Drawing on extensive empirical research the authors pose the thought provoking question of whether creativity can be taught This volume will be of interest to both students and scholars of creativity and higher education as well as to creatively based practitioners more widely

Stakeholders' Perspectives on Assessment and Improvement of Quality in Early Childhood Education and Care: A World-Wide Kaleidoscope Antonia Elisabeth Enikoe Baumeister, Hui Li, Linda Joan Harrison, 2024-08-29 The key aims of early childhood education and care ECEC are to offer children from all social backgrounds a good start in their lives to support parenting as well as families workforce participation and thereby to sustainably strengthen the national economy over current and future generations High quality ECEC has been shown to improve child outcomes and be a buffer against developmental risk factors For these reasons governments ECEC providers and researchers are placing an increasing focus on the frameworks and systems that underpin quality as well as the measures that assess quality At the same time however research on ECEC as a multidisciplinary endeavor has shown that the aims and benefits of high quality ECEC can only be reached when all stakeholders needs are acknowledged and sufficiently met For example recent evidence suggests that the acceptability and social validity of quality assessment and improvement methods are contested among some stakeholders and thus the sustainability of these quality efforts may be in doubt New challenges also include the ever changing nature and circumstances affecting ECEC stakeholders for example the greater flows of refugee families and the impact of the Covid 19 pandemic This Frontiers Research Topic will contribute to an updated knowledge base in order to inform governments providers and the scientific community about best practices and new solutions for conceptualizing measuring and improving ECEC quality The aim of the proposed Research Topic is to

generate a worldwide kaleidoscope of research studies that explore and discuss models for gathering the perspectives of multiple stakeholders and considering the meaningfulness of stakeholder views for conceptualizing assessing and improving quality in ECEC We believe that greater attention needs to be given to the diversity of stakeholders who are invested in ECEC including government regulatory authorities service providers educators families communities and children We also believe that wide ranging stakeholder input will generate innovative methods for assessing and improving quality that keep pace with our rapidly changing information society Two further foci are set on ECEC practices 1 that support participation diversity and inclusion of all children and families and 2 that are suitable for developing countries and diverse populations within countries In this the focus is not only on best practices but also on the limitations of practices In soliciting research articles on ECEC stakeholder perspectives we describe stakeholders as inclusive of government non government regulatory agencies service providers teachers and caregivers families communities and children Themes of interest include but are not limited to Assessment of quality in ECEC including self assessment approaches The design of and use of quality frameworks in ECEC Effects of quality and of quality improvement on children and families Drivers and indicators of quality improvement Acceptance and sustainability of quality efforts among ECEC stakeholders Policy expectations of quality rating and improvement systems e g funding policy The role of teacher and caregiver professionalization All types of center based and home based ECEC We are interested both in quantitative and qualitative research designs as well as in mixed methods research Cross sectional longitudinal quasi experimental and case study designs are welcome The following article types are welcome original research empirical studies systematic reviews community case studies policy briefs articles and brief research reports

Psychology and Law Curt R. Bartol, Anne M. Bartol, 2018-11-27 I like the use of research and citations throughout the text It is more comprehensive than my current text and does a much better job of presenting the scientific evidence Kathy McGuire Western Illinois University Written by authors with extensive experience in the field and in the classroom *Psychology and Law Research and Practice* Second Edition offers the definitive perspective on the practical application of psychological research to the law Curt R Bartol and Anne M Bartol emphasize the various roles psychologists and other mental health professionals play in criminal and civil legal matters Topics such as family law mental health evaluations police interrogation jury selection and decision making involuntary civil commitment and various civil capacities are included The authors also emphasize the major contributions psychological research has made to the law and encourage critical analysis through examples of court cases high profile current events and research This comprehensive book examines complex material in detail and explains it in an easy to read way New to the Second Edition The new edition has been significantly reorganized to more closely align with the progression through the court system A new chapter on children adolescents and criminal law Chapter 8 provides students with information on adjudicative competence comprehension of constitutional rights and eyewitness identification and courtroom testimony New feature boxes include case studies research

projects and contemporary topics with discussion questions for classroom debate Additional court cases and statutes have been integrated into chapters to emphasize the important role psychology plays in the legal process The content is applied to real cases such as the Masterpiece Cakeshop case and the Dassey confession comprehending Miranda Over 300 recent research findings on topics related to psychology and law highlight cutting edge research studies that help students understand what research does and prompt them to discuss the methodology and results New pedagogical tables clearly illustrate complex information around ethical issues APA amicus briefs strengths and weaknesses of simulation studies insanity standards within the states effects experienced by survivors of traumatic incidents and more Increased coverage of contemporary issues encourage critical thinking and active learning by promoting discussions around current issues such as telepsychology neuropsychology adversarial allegiance and actuarial instruments used in bail and sentence decision making
