

Take a look at the example here.

From a 3/4 length view the shot is flattering, yet showing the body full length simply makes her look shorter. This is the exact same shot, just cropped differently. The cropped version produces a much more flattering result.

Shooting from a higher angle can make a subject look shorter (torso and legs look compressed), and also can make the neck appear shorter. As with anything good, use with moderation! If your angle gets too high, the subject looks extremely short and can even start to look like they have cartoon-like features.

three quarter

In fact, when shooting full-length shots of a shorter subject, I may actually back up, zoom in, and take a slightly lower angle of view to make my subject look taller. To compensate for my lower angle, I have my subject lean more toward

full length

the camera, with her hips pushed back to help get her body back in proportion.

Don't know which angle looks best? Move around and shoot a bit! Each subject is different!
